

CHEVROLET RADIOS

Each of the optional Chevrolet Radios will give you the same powerful, undistorted reception. The radios differ mainly in their operating controls which are reviewed here.

Manually Tuned Radio

LEFT HAND KNOB—The outer knob turns the set on and off and controls the volume.

The inner "wing knob" may be moved to change the tone from treble (extreme clockwise) to bass (extreme counterclockwise).

RIGHT HAND KNOB—The outer knob manually selects radio stations.

The inner "wing knob" allows continuous control of front and/or optional rear seat speakers when the rear seat speaker is installed.

Push Button Radio

The push button radio has the manual tuning control knobs plus push buttons which automatically select preset stations when pushed in.

To preset the push buttons:

1. Warm up the radio for 10 minutes (20 minutes in freezing temperatures).
2. Pull the push button straight out as far as it will go.
3. Tune the desired station manually.
4. Push the button all the way in.
5. Check operation of push button and repeat Steps 1 through 4 if tuning is not accurate.
6. Repeat this procedure for each push button.

Antenna

Always extend the antenna to at least the level of the roof or to full length for long distance listening.
