 affected working class organization and mobilization increasing inequality by redistribution upwards from labour to capital
 However workers around the world are challenging their increased exploitation by globalizing corporations In developed
 countries many unions are transforming themselves to confront employer power in ways more appropriate to contemporary
 circumstances in developing countries militant new labour movements are emerging Drawing upon insights in anti
 determinist Marxian perspectives Verity Burgmann shows how working class resistance is not futile as protagonists of
 globalization often claim She identifies eight characteristics of globalization harmful to workers and describes and analyses
 how they have responded collectively to these problems since 1990 and especially this century With case studies from around
 the world including Greece since 2008 she pays particular attention to new types of labour movement organization and
 mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or
 political institutions to change Aging and less agile manifestations of the labour movement decline while new expressions of
 working class organization and mobilization arise to better battle with corporate globalization This book will be of interest to
