Optimization Problems: Algorithms, Applications And Complexity Ding-zhu Du, Panos M Pardalos, 1993-04-27 In the past few

decades there has been a large amount of work on algorithms for linear network flow problems special classes of network problems such as assignment problems linear and quadratic Steiner tree problem topology network design and nonconvex

cost network flow problems Network optimization problems find numerous applications in transportation in communication

network design in production and inventory planning in facilities location and allocation and in VLSI design The purpose of

this book is to cover a spectrum of recent developments in network optimization problems from linear networks to general

nonconvex network flow problems a *Integer Programming and Combinatorial Optimization* Friedrich Eisenbrand, Bruce

Shepherd, 2010-06-09 The idea of a refereed conference for the mathematical programming community was proposed by Ravi

Kannan and William Pulleyblank to the Mathematical Programming Society MPS in the late 1980s Thus IPCO was born and

MPS has sponsored the conference as one of its main events since IPCO I at the University of Waterloo in 1990 The

conference has become the main forum for recent results in Integer Programming and Combinatorial Optimization in the non

Symposium years This volume compiles the papers presented at IPCO XIV held June 9-11 2010 at EPFL in Lausanne The

scope of papers considered for IPCO XIV is likely broader than at IPCO I This is sometimes due to the wealth of new

questions and directions brought from related areas It can also be due to the successful application of math programming

techniques to models not traditionally considered In any case the interest in IPCO is greater than ever and this is reflected in

both the number 135 and quality of the submissions The Programme Committee with 13 members was also IPCO's largest We

thank the members of the committee as well as their sub-reviewers for their exceptional and time-consuming work and

especially during the online committee meeting held over January The process resulted in the selection of 34 excellent

research papers which were presented in non-parallel sessions over three days in Lausanne Unavoidably this has meant that

many excellent submissions were not able to be included Distributed Computing Yehuda Afek, 2013-10-04 This book
