

Egg Drop Contest

In this contest, a team of one to two students will construct a device that will enclose and protect an egg from cracking or breaking when it is dropped from a certain height (about 20 ft.) towards a target on the ground. The goal is to build a device with the least weight and the shortest dimensions, and will land as close to the target as possible.

MATERIALS AND DESIGN:

You will be given a budget of \$1000.00 and you will be able to purchase items that your teacher has brought to the class. You cannot exceed your budget. You are permitted to bring items from home as long as they meet the specifications of the project.

The device cannot have a dimension (diameter or diagonal in any direction) longer than 60 centimeters. This means that the device must be able to fit inside a sphere with a 60 cm diameter. If the device has wings or a parachute, the longest length will be measured with the wings or parachute fully expanded.

Your teacher will supply medium sized eggs. If you wish to put your egg inside a protective device, at least 1 square cm of the egg's surface must be visible from the outside. Any additional material like tape or glue to close or hold it together after the egg is enclosed will be included in the weight of the device.

SUGGESTED MATERIALS:

Trash bags, paper cups, rubber bands, heavy paper, balloons, Kleenex, paper towels, cotton, aluminum foil, coffee filter, tape, foam peanuts, string, etc.

CALCULATIONS:

Mathematically, the following statements can be made, where "Δ" means "the change in".

$$v = d / t$$

$$d = \frac{1}{2} g t^2$$

$$a = \Delta v / \Delta t$$

$$F = ma$$
