

Adult Basic and Advanced Life Support

Cardiac Arrest

Burden of disease
Affects individuals across age, gender, race, geography, and socioeconomic status

Out-of-hospital
An estimated 400,000 per year in the United States and Canada combined, with a survival rate of 10%

In-hospital
Without a national registry in Canada, the combined numbers are unknown. However, over 290,000 per year in the United States, with a survival rate of 25%

CPR and Access

2020 Guidelines reaffirm the need for early initiation of High-quality CPR

Real-time audiovisual feedback is suggested as a means to maintain CPR quality.

Depth of at least 5 cm (2 inches) for chest compressions

100 to 120/min

Administer Epinephrine
Administer as soon as feasible for nonshockable rhythms and after defibrillation has failed in shockable rhythms.

Attempt IV Before IO
Emphasis is on intravenous as first access attempt; if that fails or is not feasible, intraosseous may be used.

Defibrillation

Critical
for cardiac arrest due to ventricular fibrillation and pulseless ventricular tachycardia

Double sequential defibrillation is shock delivery by 2 defibrillators nearly simultaneously.

The usefulness of double sequential defibrillation has not been established for refractory shockable rhythms. Routine use of double sequential defibrillation is not recommended at this time.

Special Considerations

Cardiac arrest due to an opioid overdose must be considered and requires individualized treatment.

Administer **naloxone** for respiratory arrest or if unsure if patient is in cardiac arrest. The most common routes of administration are intravenous, intramuscular, or intranasal. New in 2020: **Algorithms** for healthcare providers and lay rescuers for treating overdoses are provided.

Cardiac arrest in pregnancy requires individualized management of resuscitation.

EMS should notify healthcare facilities in advance to ensure all resources are available for both infant and mother.

Focus on **maternal resuscitation**, with preparation for **perimortem caesarean delivery** if necessary.

Perform **left uterine displacement** during CPR to improve perfusion.

New in 2020

Point-of-care ultrasound: If an **experienced sonographer** is **present** and the use of ultrasound **does not interfere** with standard cardiac arrest protocol, then it may be considered as an adjunct, although its usefulness has not been well established.

Neuroprognostication: **Multiple modalities** should be used to improve decision-making accuracy.

Post-cardiac arrest care: Emphasis is on **interventions during the initial stabilization phase** as well as on **continued management** and additional emergent activities.

Chain of Survival: A **new link—recovery**—has been added. Full recovery can take a year or more. Because recovery continues long **beyond initial hospitalization**, provide assessment and support for physical, cognitive, and psychosocial needs.

American Heart Association Guidelines For

John M. Field

American Heart Association Guidelines For:

ACSM's Resource Manual for Guidelines for Exercise Testing and Prescription David P. Swain, ACSM, Clinton A. Brawner, 2012-12-26 ACSM's Resource Manual for Guidelines for Exercise Testing and Prescription was created as a complement to ACSM's Guidelines for Exercise Testing and Prescription and elaborates on all major aspects of preventative rehabilitation and fitness programs and the major position stands of the ACSM. The 7th edition provides information necessary to address the knowledge, skills, and abilities set forth in the new edition of Guidelines and explains the science behind the exercise testing and prescription. ACSM's Resource Manual is a comprehensive resource for those working in the fitness and clinical exercise fields as well as those in academic training. [The Textbook of Emergency Cardiovascular Care and CPR](#) John M. Field, 2009 With an editorial team of leading experts from the American College of Emergency Physicians and the American Heart Association, this book is the first complete clinically oriented reference textbook in emergency cardiovascular care and CPR. The book translates bench research to the clinician's bedside needs and addresses end-of-life issues. The content is appropriate for a large audience including early caregivers, emergency department and CCU nurses, students, residents, fellows, and hospitalists responsible for cardiovascular emergency situations. A companion Website will include the fully searchable text, instructional videos produced by the AHA, and links to ACC, AHA, ASE, ACEP, and ILCOR guidelines and policy statements. **Principles of Pediatric and Neonatal Emergencies** Panna Choudhury, Arvind Bagga, Krishan Chugh, Siddharth Ramji, 2011 *Priorities in Critical Care Nursing - E-Book* Linda D. Urden, Kathleen M. Stacy, Mary E. Lough, 2022-10-27 American Journal of Nursing (AJN) Book of the Year Awards 2nd Place in Critical Care Emergency Nursing 2023 Selected for Doody's Core Titles 2024 in Critical Care Focus on the most important concepts in progressive and critical care nursing with *Priorities in Critical Care Nursing* 9th Edition. Ideal for students, practicing nurses, and those undergoing in-service training for progressive and critical care and progressive or critical care nurses reviewing for PCCN or CCRN certification, this trusted evidence-based textbook uses the latest, most authoritative research to help you identify patient priorities in order to safely and expertly manage patient care. Succinct coverage of all core progressive and critical care nursing topics includes medications, patient safety, patient education, problem identification, and interprofessional collaborative management.
