The development of smart voice assistants like Apple Siri, Amazon Alexa, Google Assistant, and Microsoft Cortana took artificial intelligence technology to a whole new level. These systems are getting trained with every interaction, which helps them understand more and more every day. On top of that, in 2022, ChatGPT shook the internet. Alongside Google Brain and BERT, they pushed the boundary of what's possible for artificial intelligence. Nowadays, we can use AI to write text, create art, translate languages, solve mathematical problems, and much more without human supervision. The developments in the field of algorithms and machine learning allow programmers to build more effective systems day by day. These models use artificial intelligence to benefit businesses as well as individuals from customer service all the way to delivery of the products. Let's take machine learning as an example of these developments. It starts with a vast amount of data from the internet, including Wikipedia, forums, and web pages. After training a model on this data, it learns how to capture the context and language rules. *Superior Customer Service* Dan Blacharski, 2006.
