Narrating Friendship and the British Novel, 1760-1830 Katrin Berndt,2016-10-14 Friendship has always been a universal category of human relationships and an influential motif in literature but it is rarely discussed as a theme in its own right In her study of how friendship gives direction and shape to new ideas and novel strategies of plot character formation and style in the British novel from the 1760s to the 1830s Katrin Berndt argues that friendship functions as a literary expression of philosophical values in a genre that explores the psychology and the interactions of the individual in modern society In the literary historical period in which the novel became established as a modern genre friend characters were omnipresent reflecting enlightenment philosophy s definition of friendship as a bond that civilized public and private interactions and was considered essential for the attainment of

happiness Berndt's analyses of genre defining novels by Frances Brooke Mary Shelley Sarah Scott Helen Maria Williams Charlotte Lennox Walter Scott Jane Austen and Maria Edgeworth show that the significance of friendship and the increasing variety of novelistic forms and topics represent an overlooked dynamic in the novel's literary history Contributing to our understanding of the complex interplay of philosophical socio cultural and literary discourses that shaped British fiction in the later Hanoverian decades Berndt's book demonstrates that novels have conceived the modern individual not in opposition to but in interaction with society continuing Enlightenment debates about how to share the lives and the experiences of others

Worm Work Janelle A. Schwartz,2012 Worms Natural history is riddled with them Literature is crawling with them From antiquity to today the ubiquitous and multiform worm provokes an immediate discomfort and unconscious distancing it remains us against them in anthropocentric anxiety So there is always something muddled or dirty or even offensive when talking about worms Rehabilitating the lowly worm into a powerful aesthetic trope Janelle A Schwartz proposes a new framework for understanding such a strangely animate nature Worms she declares are the very matter with which the Romantics rethought the relationship between a material world in constant flux and the human mind working to understand it *Worm Work* studies the lesser known natural historical records of Abraham Trembley and his contemporaries and the familiar works of Erasmus Darwin Charles Darwin William Blake Mary Shelley and John Keats to expose the worm as an organism that is not only reviled as a taxonomic terror but revered as a sign of great order in nature as well as narrative This book traces a pattern of cultural production a vermiculture that is as transformative of matter as it is of mind It distinguishes decay or division as positive processes in Romantic era writings compounded by generation or renewal and used to represent the biocentric complex structuring of organicism Offering the worm as an archetypal figure through which to recast the evolution of a literary order alongside questions of taxonomy from 1740 to 1820 and on Schwartz unearths Romanticism as a rich humus of natural historical investigation and literary creation
