Doing Global History Roland Wenzlhuemer, 2019-10-31 The field of Global History has experienced an unprecedented boom in the last two decades and carved itself deeply into the practice of historical research. Despite this, its conceptual foundations have rarely been explored. This introduction to what Global History is brings together theory and practice with 6 key concepts delivered through 6 accessible case studies. Re-evaluating the central concerns and key approaches in the field, it offers an up-to-date discussion of the foundations of Global History, its guiding questions and principal methods at work. *Doing Global History* offers students valuable insights into the ways general concepts can be used and applied when doing historical research. The 6 concepts—connections, actors, structures, space, time, and transit—and their accompanying examples will not only help readers to get a solid grasp of what global history means but will stimulate further engagement in the field. Wenzlhuemer successfully shows that global history is best considered as a perspective, not a theory or paradigm, and guides the reader through ways it can be used in practice to draw new and exciting conclusions. Tailored for classroom and student use, this book will be invaluable to advanced undergraduates and postgraduates of Global History.

Global History and New Polycentric Approaches Manuel Perez Garcia, Lucio De Sousa, 2017-12-06 This book is open access under a CC BY 4.0 license. Rethinking the ways global history is envisioned and conceptualized in diverse countries such as China, Japan, Mexico, or Spain, this collection considers how global issues are connected with our local and national communities. It examines how the discipline has evolved in various historiographies from Anglo-Saxon to southern European and its emergence in Asia with the rapid development of the Chinese economy, motivation to legitimate the current uniqueness of the history and economy of the nation. It contributes to the revitalization of the field of global history in Chinese historiography, which has been dominated by national narratives and promotes a debate to open new venues in which important features such as scholarly mobility, diversity, and internationalization are firmly rooted, putting aside national specificities. Dealing with new approaches on the use of empirical data by framing the proper questions and hypotheses and connecting western and eastern sources, this text opens a new forum of discussion on how global history has penetrated in western and eastern historiographies, moving the pivotal axis of analysis from national perspectives to open new venues of global history.

Explorations in History and Globalization Cátia Antunes, Karwan Fatah-Black, 2016-04-14 Considering the ways in which the global turn is changing the theory and practice of historical disciplines, *Explorations in History and Globalization* engages with the concept and methodology of globalization, challenging traditional divisions of space and time to offer a range of perspectives on how globalization has affected social, economic, political, and cultural history. Each chapter covers a specific theme, discussing how globalization has shaped these themes and how they have contributed to globalization throughout history. Including topics such as ecological exchanges, trade exchanges, knowledge migration, empire, and urbanization, this volume both explains historical trajectories through a global analytical framework and provides tools that

students can employ when posing their own research questions about historical globalization. Containing suggestions for further reading and guidance on the ways in which primary source material can be used as a basis for global historical studies, this is the ideal volume for all students interested in the global exchanges between people throughout history.

Global History, Globally Sven Beckert, Dominic Sachsenmaier, 2018-02-22 In recent years, historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past. Despite all these efforts to gain new global historical visions, however, the debates surrounding this movement have remained rather provincial in scope. **Global History Globally** addresses this lacuna by surveying the state of global history in different world regions. Divided into three distinct but tightly interweaved sections, the book's chapters provide regional surveys of the practice of global history on all continents, review some of the research in four core fields of global history, and consider a number of problems that global historians have contended with in their work. The authors hail from various world regions and are themselves leading global historians. Collectively, they provide an unprecedented survey of what today is the most dynamic field in the discipline of history. As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them, **Global History Globally** is a must-read book for all students and scholars of global history.

Climate Change and the Course of Global History John L. Brooke, 2014-03-17 The first global study by a historian to fully integrate the earth system approach of the new climate science with the material history of humanity.

Discipline Problems Tadashi Dozono, 2024-05-07 Angel, a Black tenth grader at a New York City public school, self-identifies as a nerd and likes to learn. But she's troubled that her history classes leave out events like the genocide and dispossession of Indigenous people in the Americas, presenting a sugar-coated image of the United States that is at odds with her everyday experience. The history she learned in school is simpler, she says. The world she lives in is a lot more complex. Angel, like every student interviewed in **Discipline Problems**, has been identified by teachers as a troublemaker, a student whose behavior disrupts classroom norms and interferes with instruction. But her critiques of the curriculum she's taught speak to her curiosity and insight, crucial foundations for understanding history. Like many students who have been marginalized by systemic racism in American schools, she exposes the shortcomings of her classrooms' academic environments by challenging both the content and the methods of her education. All too often, these challenges are framed as troublemaking, and the students are disciplined for acting out instead of being rewarded for their intellectual engagement. Tadashi Dozono, a professor of education and former high school social studies teacher, takes seriously the often overlooked critiques that students of color who get labeled as troublemakers direct toward their high school history curriculum. He reinterprets troublemaking, usually cast as a behavioral deficit, as an intellectual asset and form of reasoning that challenges the disciplining reason of classrooms where whiteness is valued over the histories and knowledge of people of color. Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to

educational practices that marginalize non white students Discipline Problems reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the curiosity intellect and knowledge of marginalized learners **Finding Buddhists in Global History** Jonathan S. Walters,1998 **Thinking Globally** Mark Juergensmeyer,2014 In this accessible text Mark Juergensmeyer a pioneer in global studies provides a comprehensive overview of the emerging field of global studies from regional topical and theoretical perspectives Each of the twenty compact chapters in Thinking Globally features Juergensmeyer s own lucid introduction to the key topics and offers brief excerpts from major writers in those areas The chapters explore the history of globalization in each region of the world from Africa and the Middle East to Asia Europe and the Americas and cover key issues in today s global era such as Challenges of the global economy Fading of the nation state Emerging nationalisms and transnational ideologies Hidden economies of sex trafficking and the illegal drug trade New communications media Environmental crises Human rights abuses Thinking Globally is the perfect introduction to global studies for students and an exceptional resource for anyone interested in learning more about this new area of study
