 problem solving resource appropriate for teachers and their students who are enrolled in high school Advanced Placement
 Chemistry or in a first year college General Chemistry course The book incorporates a chemistry problem solving plan one
 that uses an innovative graphic organizer strategy The strategy successfully evaluated with students combines problem
 solving processes with chemical concepts that will allow students to solve the most common and difficult problems
 encountered in the first year of chemistry Topical problem solving will focus on limiting reactant stoichiometry identifying
 types of chemical reactions equilibrium acid base equilibria and electrochemistry Why would this resource be of interest to
 chemistry students To be successful to get into a well known college medical school physical therapy or graduate program
 often requires that students get an A in your pre requisite Introductory General Chemistry course To make matters worse
 many college professors feel that only a few students should get A grades and therefore they give difficult exams that many
 students fail this is the weeding out process that every pre health student is apprehensive about To succeed in this
 competitive environment entails not just studying harder or longer it means re organizing textbook content so that it is
 meaningful to the student This is the first text of its kind to employ a reliable research based strategy that incorporates a
 decision based visual tool to solve chemistry textbook problems ones that can make or break a career Solutions Guide for
