The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace's reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America's oldest public schools

The New Democratic Professional in Education Gary L. Anderson, Michael Ian Cohen, 2018-08-17 This timely and accessible book examines two waves of business influence that created models of schooling that are out of touch with the experiences of students the professional expertise of teachers and the needs and interests of local communities The book also describes the forms of resistance that are currently emerging to fight for the democratic mission of a public education Building on these promising efforts the authors present a vision for a new democratic professional that is grounded in participatory communities of practice as well as advocacy for and input from school communities

No Longer Newsworthy Christopher R. Martin, 2019-05-15 Until the recent political shift pushed workers back into the media spotlight the mainstream media had largely ignored this significant part of American society in favor of the moneyed upscale consumer for more than four decades Christopher R Martin now reveals why and how the media lost sight of the American working class and the effects of it doing so The damning indictment of the mainstream media that flows through No Longer Newsworthy is a wakeup call about the critical role of the media in telling news stories about labor unions workers and working class readers As Martin charts the decline of labor reporting from the late 1960s onwards he reveals the shift in news coverage as the mainstream media abandoned labor in favor of consumer and business interests When newspapers especially wrote off working class readers as useless for their business model the American worker became invisible In No Longer Newsworthy Martin covers this shift in focus the loss of political voice for the working class and the emergence of a more conservative media in the form of Christian television talk radio Fox News and conservative websites Now with our fractured society and news media Martin offers the mainstream media recommendations for how to push back against right wing media and once again embrace the working class as critical to its audience and its democratic function

The Years That Matter Most Paul Tough, 2019-09-12 What has gone wrong in our universities And how do we make it right When Amy applied to university she thought she d be judged purely on her merits But she never thought that her family background would have as much impact on her future as her grades When KiKi arrived at university she knew she could be the only black woman in her class But she didn t know how out of place she would feel nor how unwelcoming her peers would be When Orry graduated from university he was told he d probably land a six figure salary But he wasn t told he d end up barely scraping a living wage struggling to feed his children Drawing on the stories of hundreds of American students The Years That Matters Most is a revelatory account of a university system in crisis Paul Tough bestselling author of *How Children Succeed* exposes a world where small town colleges go bust while the most prestigious raise billions every year where overstretched admissions officers are forced to pick rich candidates over smart ones where black and working class students are left to sink or swim on uncaring campuses Along the way he uncovers cutting edge research from the academics leading the way to a new kind of university one where students succeed not because of their

background but because of the quality of their minds The result is a call to arms for universities that work for everyone and a manual for how we can make it happen

Game Theory and Applications Deng-Feng Li, Xiao-Guang Yang, Marc Uetz, Gen-Jiu Xu, 2017-10-13 This volume constitutes the refereed post conference proceedings of the 3rd Joint China Dutch Workshop on Game Theory and Applications and the 7th China Meeting on Game Theory and Applications GTA 2016 held in Fuzhou China in November 2016 The 25 revised full papers presented were carefully reviewed and selected from 60 full paper submissions They deal with a broad range of topics in the areas of non cooperative and cooperative games non cooperative and cooperative games under uncertainty and their applications

Globally Generated Vector Bundles with Small c_1 on Projective Spaces Cristian Anghel, Iustin Coandă, Nicolae Manolache, 2018-05-29 The authors provide a complete classification of globally generated vector bundles with first Chern class $c_1 \leq 5$ on the projective plane and with $c_1 \leq 4$ on the projective n space for $n \geq 3$ This reproves and extends in a systematic manner previous results obtained for $c_1 \leq 2$ by Sierra and Ugaglia J Pure Appl Algebra 213 2009 2141–2146 and for $c_1 \leq 3$ by Anghel and Manolache Math Nachr 286 2013 1407–1423 and independently by Sierra and Ugaglia J Pure Appl Algebra 218 2014 174–180 It turns out that the case $c_1 \leq 4$ is much more involved than the previous cases especially on the projective 3 space Among the bundles appearing in our classification one can find the Sasakura rank 3 vector bundle on the projective 4 space conveniently twisted The authors also propose a conjecture concerning the classification of globally generated vector bundles with $c_1 \leq n-1$ on the projective n space They verify the conjecture for $n \leq 5$

After the Education Wars Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points the way to genuine reform Diane Ravitch author of Reign of Error and The Death and Life of the Great American School System A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has

become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what s needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools
