Author Dave Stribling specializes in modular engine swaps and expertly guides you through each crucial step of the engine transplant process. Because of the large physical size many components such as brake boosters, steering rods and boxes and other underhood components may need repositioning or modification to co-exist in the engine bay. Stribling covers motor mount selection and fabrication, suspension and chassis modifications, aftermarket suspension options, firewall and transmission tunnel modifications, engine management and wiring procedures, fuel systems, exhaust systems, electrical mods and upgrades and much more. Many older Ford muscle and performance cars are prime candidates for a modular swap; however, shock towers protrude into the engine bay of these cars so modifications are necessary to fit the engine into the car, which is also covered here. Swapping the engine and transmission into a muscle car or truck requires specialized processes, and this insightful explanatory and detailed instruction is found only in this book. If you are considering swapping one of these high-tech engines into a non-original chassis, this book is a vital component to the process.

Muscle Car Special Editions Duncan Scott Brown, 2021-08-15. Get one before one gets you. Motion Performance's catchy sales pitch for builder Joel Rosen's Phase III Specialty Muscle Cars sums up the escalating performance scene in the late 1960s. Special edition muscle cars were essential to keep pace. Joel and other independent car builders such as Carroll Shelby, George Hurst, Dick Harrell, Mr. Norm and Jim Wangers did what the factories couldn't do: take the muscle car and turn it into a tire-burning monster. Although the Pontiac GTO established the muscle car category in 1964, a host of corporate safety restrictions restrained factories from offering turn-key race cars off the showroom floor. Independent car builders enhanced appearance and amplified performance in an attempt to do what the manufacturers wouldn't. Motion Performance issued a written guarantee: Phase III cars would run 11.5 at 120 mph down the quarter mile. Some of the most iconic nameplates in automotive history were applied in this era, with names that included Cheetah, Black Panther, Royal Bobcat, Super Hucker, Manta Ray, Super Snake, Deuce Fast Track and The Machine. How did manufacturers stealthily promote these special edition muscle cars as halo cars while pretending not to endorse them? What happened to these innovators when

factories assimilated their ideas It s all covered inside Muscle car historian Duncan Brown takes us through these special edition muscle cars their creators and the behind the scenes forces that shaped these wild beasts into legends that left a lasting legacy
