2014 Mid Year Pphysical Sciences Memo:

NASA Technical Memorandum, 1988 Researching Higher Education in Asia Jisun Jung, Hugo Horta, Akiyoshi Yonezawa, 2017-09-05 This book discusses higher education research as a field of study in Asia It traces the evolution of research in the field of higher education in several Asian countries and shares ideas about the evolving higher education research communities in Asia It also identifies common and dissimilar challenges across national communities providing researchers and policymakers essential new insights into the relevance of a greater regional articulation of national higher education research communities and their further integration into and contribution to the international higher education research community as a whole **The Budget of the United States Government** United States. Office of Management and Budget, 2015 **Road Vehicle Automation 4** Gereon Meyer, Sven Beiker, 2017-06-28 This book is the fourth volume of the sub series of the Lecture Notes in Mobility dedicated to Road Vehicle Automation Its chapters have been written by researchers engineers and analysts from all around the globe Topics covered include public sector activities human factors and challenges ethical legal energy and technology perspectives vehicle systems development as well as transportation infrastructure and planning The book is based on the Automated Vehicles Symposium which took place in San Francisco California USA in July 2016 **Monarchs and Milkweed** Anurag Agrawal, 2017-03-28 The fascinating and complex evolutionary relationship of the monarch butterfly and the milkweed plant Monarch butterflies are one of nature s most recognizable creatures known for their bright colors and epic annual migration from the United States and Canada to Mexico Yet there is much more to the monarch than its distinctive presence and mythic journeying In *Monarchs and Milkweed* Anurag Agrawal presents a vivid investigation into how the monarch butterfly has evolved closely alongside the milkweed a toxic plant named for the sticky white substance emitted when its leaves are damaged and how this inextricable and intimate relationship has been like an arms race over the millennia a battle of exploitation and defense between two fascinating species The monarch life cycle begins each spring when it deposits eggs on milkweed leaves But this dependency of monarchs on milkweeds as food is not reciprocated and milkweeds do all they can to poison or thwart the young monarchs Agrawal delves into major scientific discoveries including his own pioneering research and traces how plant poisons have not only shaped monarch milkweed interactions but have also been culturally important for centuries Agrawal presents current ideas regarding the recent decline in monarch populations including habitat destruction increased winter storms and lack of milkweed the last one a theory that the author rejects He evaluates the current sustainability of monarchs and reveals a novel explanation for their plummeting numbers Lavishly illustrated with more than eighty color photos and images *Monarchs and Milkweed* takes readers on an unforgettable exploration of one of nature s most important and sophisticated evolutionary relationships The impact of spending cuts on science and scientific research Great Britain: Parliament: House of Commons: Science and Technology Committee, 2010-03-25 The pressure to be seen to be making cuts across the

public sector is threatening to undermine both the Government's good record on investment in science and the economic recovery. Whilst the contribution of a strong domestic science base is widely acknowledged, methodological problems with quantifying its precise value to the economy mean that it is in danger of losing out in Whitehall negotiations. Scientists are under increasing pressure to demonstrate the impact of their work and there is concern that areas without immediate technology applications are being undervalued. The Committee believes the Government faced a strategic choice: invest in areas with the greatest potential to influence and improve other areas of spending or make cuts of little significance now but that will have a devastating effect upon British science and the economy in the years to come.

Telecommunications

Research and Engineering at the Communications Technology Laboratory of the Department of Commerce

National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee on Telecommunications Research and Engineering at the Department of Commerce's Boulder Laboratories, 2015-11-30. The Department of Commerce operates two telecommunications research laboratories located at the Department of Commerce's Boulder Colorado campus: the National Telecommunications and Information Administration's NTIA's Institute for Telecommunications Sciences ITS and the National Institute of Standards and Technology's NIST's Communications Technology Laboratory CTL. CTL develops appropriate measurements and standards to enable interoperable public safety communications, effective and efficient spectrum use and sharing, and advanced communication technologies. CTL is a newly organized laboratory within NIST formed mid 2014. As it is new and its planned work represents a departure from that carried out by the elements of which it was composed, this study focuses on its available resources and future plans rather than past work. The Boulder telecommunications laboratories currently play an important role in the economic vitality of the country and can play an even greater role given the importance of access to spectrum and spectrum sharing to the wireless networking and mobile cellular industries. Research advances are needed to ensure the continued evolution and enhancement of the connected world the public has come to expect.

Resurgence and

Revalorization of Indigenous Knowledge Systems in the Contemporary Society Masenya, Tlou Maggie, Bhuda, Monicca Thulisile, 2025-05-08. Indigenous knowledge is the comprehensive body of knowledge that locals accumulate from life experience, unofficial research, and close observation of their surroundings within a particular culture. It connects the entirety of nature and the components that sustain life to the survival of every human being. Additionally, it gives specific community conditions in respect to the environment and offers workable answers to people's problems. As a result, by preserving indigenous knowledge systems, indigenous knowledge may provide value to the community by offering innovative solutions to social, environmental, and economic issues. **Resurgence and Revalorization of Indigenous Knowledge Systems in the Contemporary Society** explores the role of indigenous knowledge in the contemporary society. Furthermore, it discusses the importance of preserving and sharing indigenous knowledge for community development. Covering topics such as
