Petrogav International provides courses for participants that intend to work on offshore drilling and production platforms. Training courses are taught by professionals from the oil and gas industry with current knowledge and years of field experience. The participants will get all the necessary competencies to work on the offshore drilling platforms and on the offshore production platforms. It is intended also for non drilling and non production personnel who work in drilling exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals etc. This course provides a non technical overview of the phases, operations and terminology used on offshore oil and gas platforms. It is intended also for non production personnel who work in the offshore drilling exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of production operations with a particular focus on the unique aspects of offshore operations.

Education for Global Responsibility Michael E. Auer,Tiia Rüttermann,2025-03-20 This book contains papers in the fields of Collaborative learning Digital transition in education AI and learning analytics in engineering education Diversity in engineering education The authors are currently witnessing a significant transformation in the development of education on all levels and especially in post secondary and higher education To face these challenges higher education must find innovative and effective ways to respond in a proper way Changes have been made in the way we teach and learn including the massive use of new means of communication such as videoconferencing and other technological tools Moreover the current explosion of artificial intelligence tools is challenging teaching practices maintained for centuries Scientifically based statements as well as excellent best practice examples are necessary for effective teaching and learning engineering The 27th International Conference on Interactive Collaborative Learning ICL2024 and 53rd Conference of International Society for Engineering Pedagogy IGIP which took place in Tallinn Estonia between 24 and 27 September 2024 was the perfect place where current trends in higher education were presented and discussed IGIP conferences have been held since 1972 on research results and best practices in teaching and learning from the point of view of engineering pedagogy science ICL conferences have been held since 1998 being devoted to new approaches in learning with a focus on collaborative learning in Higher Education Nowadays the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in learning and Engineering Pedagogy In this way the authors try to bridge the gap between pure scientific research and the everyday work of educators Interested readership includes policymakers academics educators researchers in pedagogy and learning theory schoolteachers learning industry further and continuing education lecturers etc *Family Oral History Across the World* Mary Louise Contini Gordon,2023-11-30 Family Oral History Across the World presents a process for memorializing family histories bringing together established oral history

standards exploratory research and narrative data analysis Based on and using a prequestionnaire and over 40 recorded interviews with people from across six continents the analysis system used in the book presents material from these interviews that brings alive the experience of the family history journey One of the guiding principles is to encourage readers to interview family members but also others outside the family unit and to produce a family history in whatever format works The book illustrates this through the inclusion of many unusual formats and stories uncovered The book is divided into a number of themes that emerged through the analysis of numerical questionnaire and narrative interview data Parts I II and III cover changing family demography case studies and factors such as memory emotion and ethics Part IV offers a pliable process and practice guide with input and examples from interviews It also discusses developing approaches to presenting oral histories from both oral historians and other interviewers and writers such as journalists With case studies as well as example guidelines and templates this volume is ideal both for academics interested in family history as well as professional genealogists and families themselves

Sample Surveys: Design, Methods and Applications, 2009-08-31 This new handbook contains the most comprehensive account of sample surveys theory and practice to date It is a second volume on sample surveys with the goal of updating and extending the sampling volume published as volume 6 of the Handbook of Statistics in 1988 The present handbook is divided into two volumes 29A and 29B with a total of 41 chapters covering current developments in almost every aspect of sample surveys with references to important contributions and available software It can serve as a self contained guide to researchers and practitioners with appropriate balance between theory and real life applications Each of the two volumes is divided into three parts with each part preceded by an introduction summarizing the main developments in the areas covered in that part Volume 29A deals with methods of sample selection and data processing with the later including editing and imputation handling of outliers and measurement errors and methods of disclosure control The volume contains also a large variety of applications in specialized areas such as household and business surveys marketing research opinion polls and censuses Volume 29B is concerned with inference distinguishing between design based and model based methods and focusing on specific problems such as small area estimation analysis of longitudinal data categorical data analysis and inference on distribution functions The volume contains also chapters dealing with case control studies asymptotic properties of estimators and decision theoretic aspects Comprehensive account of recent developments in sample survey theory and practice Discusses a wide variety of diverse applications Comprehensive bibliography EDN.
