Seismic Design and Performance of Structures, Soil-Structure Interaction B. K. Maheshwari, Rajib Sarkar, Abhishek Kumar, 2025-07-29 This book will present the select proceedings of the 8th International Conference on Recent Advances in Geotechnical Earthquake Engineering and Soil Dynamics 8ICRAGEE held at the Indian Institute of Technology IIT Guwahati between December 11 and 14 2024 It contains the latest research

papers covering the contributions and accomplishments in geotechnical earthquake engineering and soil dynamics in the last four years. The five volumes of the book cover a wide range of topics including but not limited to seismic hazard analysis, wave propagation and site characterization, dynamic properties and liquefaction of soils, pile foundations, offshore foundations, seismic design of retaining structures and dams, seismic slope stability and landslides, dynamic soil structure interaction, seismic design of structures. Further recent developments on these topics are covered in different chapters. This book will be valuable not only for researchers and professionals but also for drawing an agenda for future courses of action from the perspective of geotechnical earthquake engineering, keeping the national need at the forefront. **Concrete International**

,1997 *The Tall Buildings Reference Book* David Parker, Antony Wood, 2013-04-12 As the ever changing skylines of cities all over the world show, tall buildings are an increasingly important solution to accommodating growth more sustainably in today's urban areas. Whether it is residential, a workplace or mixed use, the tower is both a statement of intent and the defining image for the new global city. The Tall Buildings Reference Book addresses all the issues of building tall from the procurement stage through the design and construction process to new technologies and the building's contribution to the urban habitat. A case study section highlights the latest, the most innovative, the greenest and the most inspirational tall buildings being constructed today. A team of over fifty experts in all aspects of building tall have contributed to the making of the Tall Buildings Reference Book, creating an unparalleled source of information and inspiration for architects, engineers and developers. **Earthquake Engineering in Europe** Mihail Garevski, Atilla Ansal, 2010-08-05 This book contains 9 invited keynote and 12 theme lectures presented at the 14th European Conference on Earthquake Engineering (ECEE) held in Ohrid, Republic of Macedonia from August 30 to September 3, 2010. The conference was organized by the Macedonian Association for Earthquake Engineering (MAEE) under the auspices of the European Association for Earthquake Engineering (EAE). The book is organized in twenty-one state-of-the-art papers written by carefully selected very eminent researchers, mainly from Europe but also from USA and Japan. The contributions provide a very comprehensive collection of topics on earthquake engineering as well as interdisciplinary subjects such as engineering seismology and seismic risk assessment and management. Engineering seismology, geotechnical earthquake engineering, seismic performance of buildings, earthquake resistant engineering, structures, new techniques and technologies and managing risk in seismic regions are all among the different topics covered in this book. The book also includes the First Ambraseys Distinguished Award Lecture given by Prof. Theo P. Tassios in the honor of Prof. Nicholas N. Ambraseys. The aim is to present the current state of knowledge and engineering practice, addressing recent and ongoing developments while also projecting innovative ideas for future research and development. It is not always possible to have so many selected manuscripts within the broad spectrum of earthquake engineering; thus, the book is unique in one sense and may serve as a good reference book for researchers in this field. Audience: This book will be of interest to civil engineers in the fields of geotechnical and structural earthquake engineering.
