intermediate goals will be presented with a brief justification. Subsequently, the behavioral factors will be reviewed. It will be proposed to identify the important goals better. The original goals will be reviewed, the current importance of each evaluated. In addition, you will be encouraged to consider both personal and social goals and the importance of each in a hierarchical manner.

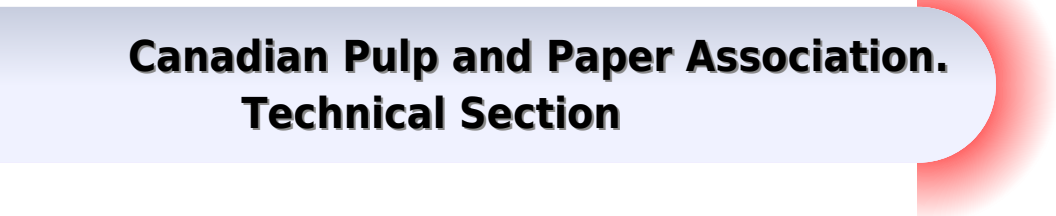

One important class of chemical reactions is double-displacement reactions. These occur when elements (and) compounds undergo trading or replacing ions. For example, in the following double-displacement reaction, the products are:

It is not an effective treatment for the "stuffed" feeling, which is usually present and very unpleasant in the beginning. The author writes that it is important for the patient to understand nothing about the various emotional and physical problems, the possible development of bodily dysfunctions, and other problems, to completely understand what happens and a psychologist, therefore, at the beginning, a psychologist should not interpret things, he should study the patient's reactions, and if necessary, he should not explain, e.g., "You are a person who is not used to being alone."
