Wetland Management and Sustainable Livelihoods in Africa Adrian Wood,Alan Dixon,Matthew McCartney,2013-06-19 In this book the authors argue for a paradigm shift in the way African wetlands are considered Current policies and wetland

management are too frequently underpinned by a perspective that views agriculture simply as a threat and disregards its important contribution to livelihoods. In rural areas where people are entrenched in poverty, wetlands in particular, wetland agriculture has a critical role to play in supporting and developing people's livelihoods. Furthermore, as populations rise and climate change takes grip, they will be increasingly important. The authors argue that an approach to wetland management that is much more people focused is required. That is an approach that instead of being concerned primarily with environmental outcomes is centred on livelihood outcomes supported by the sustainable use of natural wetland resources. The authors stress the need for Integrated Water Resource Management and landscape approaches to ensure sustainable use of wetlands throughout a river catchment and the need for wetland management interventions to engage with a wide range of stakeholders. They also assess the feasibility of creating incentives and value in wetlands to support sustainable use. Drawing on nine empirical case studies, this book highlights the different ways in which sustainable use of wetlands has been sought, each case focusing on specific issues about wetlands, agriculture and livelihoods.

Impact of Organized Crime on Murder of Law Enforcement Personnel at the U.S.-Mexican Border Sara Schatz, 2014-07-14. This brief fills a gap in the studies of organized crime in Mexico. Kan 2012, Ros 2011, Dell 2011, by documenting and mapping the post 2008 assassination of Mexican border police chiefs. It traces out a systematic of law enforcement assassination in Northern Tier Mexico, showing how the selective, often sequential, hits by cartels on chiefs in border towns and along key drug trafficking corridors has proven an effective strategy by organized crime elements to serve several goals: 1 to retaliate for federal state and local prosecution; 2 to try and neutralize police chiefs; 3 to achieve intermittent local governance and/or to seed corrupt police chiefs at the municipal level; and 4 to reduce local governmental capacity to obtain greater freedom for movement of goods. It is argued that the tactical advantage of organized crime elements gives them relatively easy physical access to law enforcement targets and thus is thus one prime element facilitating the use of assassination as a strategy. U.S. and Mexican legal, political and judicial institutions have not been able to adequately restrict opportunity for law enforcement assassinations. The inability to reduce access to weapons and officials to increase security for police personnel to reduce corruption and punish offenders sets the stage for the assassination of local law enforcement. Yet it is the goals of organized crime elements to clear drug smuggling routes and to try and gain more pliant governance at the municipal level that ultimately motivate such killings.
