Zernike moments normalized moments and Fourier Mellin descriptors the Integrated Neural Network and the connectionist gluing approach A practicality analysis shows that AUGURS can handle around 100 symbols about the size of a discipline library To enable AUGURS to handle even more symbols future work is planned to augment it with domain specific knowledge and other improvements **Quick Reference to IEEE Standards** ,1986 A complete index of all terms in IEEE Standards and ANSI Standards published by IEEE together with tables of contents of all the documents indexed Cover
