Annual Report National Cancer Institute (U.S.). Division of Cancer Prevention and Control,1988

Therapy Manuals for Drug Addiction Dennis C. Daley,2002

Handbook of Behavior Modification with the Mentally Retarded J. L. Matson,2013-03-14

Mental retardation has probably existed for as long as mankind has inhabited the earth

References to seemingly retarded persons appear in Greek and Roman literature

Examination of Egyptian mummies suggests that some may have suffered from diseases associated with mental retardation

Mohammed advocated feeding and housing those without reason

There is other evidence for favorable attitudes toward the retarded in early history but attitudes varied from age to age and from country to country

The concept of remediation did not emerge until the nineteenth century

Earlier in 1798 Itard published an account of his attempt to train the wild boy of Aveyron

A rash of efforts to habilitate retarded persons followed

Training schools were developed in Europe and the United States in the 1800s however these early schools did not fulfill their promise and by the end of the nineteenth century large inhumane warehouses for retarded persons existed

The notion of habilitation through training had largely been abandoned and was not to reappear until after World War II

The coverage includes the key features of Bulimia Nervosa associated problems psychological theories and different treatment approaches

There is special focus on cognitive factors with case examples used to illustrate the two most articulated cognitive treatments for the disorder

Emerging topics such as imagery and metacognition are covered as are service issues such as stepped care and practice guidelines

Drawing on research and theory from cognitive and non clinical areas of psychology

The Psychology of Bulimia Nervosa provides an original and challenging perspective on this debilitating condition

It questions assumptions about cognitive theory of Bulimia Nervosa and the role of standard cognitive therapy in treating the problem

suggests novel ideas and a revised treatment and outlines areas for further research activity
