An Overview of South African Human Resources Development Andre Kraak, 2004 This book provides an overview of human resources development HRD in South Africa It focuses on three institutional subsystems within the larger South African social system that play an important role in developing human resources namely the youth labour market the world of work with its associated enterprise training system the national system of science and innovation The analysis shows how in the current South African context contradiction and incoherence characterise the interaction between institutions in each of these three subsystems The book also argues that the skills problem is not located only at the high skills end but also in intermediate and low skill needs Each of these skill bands are experiencing severe HRD problems which require urgent resolution The author argues that solutions to these problems lie in cross sectoral governmental policy coordination and implementation and that in the absence of such joined up action HRD problems will continue to fall between the discrete mandates of separate government departments
