Musculoskeletal Ultrasound-Guided Regenerative Medicine Yasser El Miedany,2022-08-17 The book examines recent developments in regenerative medicine and the use of musculoskeletal ultrasound Musculoskeletal regeneration has become a prominent research topic no doubt due to the sociological and economic pressures imposed by the current ageing population The ever expanding role of regenerative medicine and the identification as well as characterization of stem cells have introduced a major paradigm shift in the field of musculoskeletal and sports medicine as well as orthopaedic surgery Whereas in the past diseased tissue was replaced with allograft material current trends in research revolve around regenerating damaged tissue Specifically regenerative medicine stands in contrast to the standard treatment modalities which impair the body's natural abilities to facilitate endogenous repair mechanisms such as anti inflammatory drugs or destructive modalities e g radiotherapy nerve ablation injections of botulinum toxin and surgical interventions that permanently alter the functioning of a joint bone or spine When compared to other allopathic options including knee and hip arthroplasty with a 90 day mortality rate of 0.7% regenerative medicine treatment modalities have a lower incidence of adverse events with a growing body of statistically significant medical literature illustrating both their safety and efficacy Focusing on the major values of regenerative medicine this book with its 21 chapters is expected to fill an important void in the current literature It will take that extra step to guide you in your day to day clinical practice Featuring contributions from a large international group of leaders in regenerative medicine and musculoskeletal ultrasonography this book is an authoritative reference for rheumatologists physiatrists sonographers radiologists physiotherapists and orthopaedic specialists

Sports-Related Concussions in Youth National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on Sports-Related Concussions in Youth,2014-02-04 In the past decade few subjects at the intersection of medicine and sports have generated as much public interest as sports related concussions especially among youth Despite growing awareness of sports related concussions and campaigns to educate athletes coaches physicians and parents of young athletes about concussion recognition and management confusion and controversy persist in many areas

Currently diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity Sports Related Concussions in Youth Improving the Science Changing the Culture reviews the science of sports related concussions in youth from elementary school through young adulthood as well as in military personnel and their dependents This report recommends actions that can be taken by a range of audiences including research funding agencies legislatures state and school superintendents and athletic directors military organizations and equipment manufacturers as well as youth who participate in sports and their parents to improve what is known about concussions and to reduce their occurrence Sports Related Concussions in Youth finds that while some studies provide useful information much remains unknown about the extent of concussions in youth how to diagnose manage and prevent concussions and the short and long term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms The culture of sports negatively influences athletes self reporting of concussion symptoms and their adherence to return to play guidance Athletes their teammates and in some cases coaches and parents may not fully appreciate the health threats posed by concussions Similarly military recruits are immersed in a culture that includes devotion to duty and service before self and the critical nature of concussions may often go unheeded According to Sports Related Concussions in Youth if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered then the culture in which these athletes perform and compete will become much safer Improving understanding of the extent causes effects and prevention of sports related concussions is vitally important for the health and well being of youth athletes The findings and recommendations in this report set a direction for research to reach this goal
