

## Chapter 20 Electricity

**Section 20.1 Electric Charge and Static Electricity****(pages 600–603)**

*This section explains how electric charge is created and how positive and negative charges affect each other. It also discusses the different ways that electric charge can be transferred.*

**Reading Strategy (page 600)**

**Identifying Main Ideas** Copy the table on a separate sheet of paper. As you read, write the main ideas. For more information on this Reading Strategy, see the **Reading and Study Skills** in the **Skills and Reference Handbook** at the end of your textbook.

| Characteristics of Electric Charge |                                                                                 |
|------------------------------------|---------------------------------------------------------------------------------|
| Topic                              | Main Idea                                                                       |
| Electric Charge                    | An excess or shortage of electrons produces a net electric charge.              |
| Electric Forces                    | Like charges repel and opposite charges attract.                                |
| Electric Fields                    | The strength of a field depends on the net charge and distance from the charge. |
| Static Electricity                 | Charge can be transferred by friction, contact, and induction.                  |

**Electric Charge (pages 600–601)**

- What are the two types of electric charge?  
a. Positive                      b. Negative
- Is the following sentence true or false? In an atom, negatively charged electrons surround a positively charged nucleus.  
true
- Is the following sentence true or false? If a neutral atom gains one or more electrons, it becomes a positively charged ion.  
false
- What is the SI unit of electric charge? The coulomb

**Electric Forces (page 601)**

- Circle the letter of each sentence that is true about electric force.
  - Like charges attract and opposite charges repel.
  - ☒ Electric force is the attraction or repulsion between electrically charged objects.
  - Electric force is inversely proportional to the amount of charge.
  - ☒ Electric force is inversely proportional to the square of the distance between two charges.
