University Chemistry, Vol. II C. Parameshwara Murthy, 2008 This is written according to revised common core syllabus of Andhra Pradesh universities. However, it is also useful for other universities since the topics are covered elaborately. Numerous problems are worked out in the text. Step by step answers are provided for unsolved problems to develop the objective bearing of the subject. Self-test questions are incorporated. Many questions from question papers of different universities of Andhra Pradesh are incorporated to give an idea of types of questions to students. Simple analogies are used to clarify the abstract concepts. Problems are given in both CGS and SI units as the question papers still contain both the unit systems. However, conversion factors of these units are given at the end of each chapter. A separate section devoted to practical chemistry is one of the highlights of this book. In which a brief theoretical background of the practicals and proforma for tabulating the data obtained are also presented.

Risk Analysis VII & Brownfields V C. A. Brebbia, 2010 This book contains the papers presented at two conferences organized by the Wessex Institute of Technology. The first conference is the Seventh International Conference on Computer Simulation in Risk Analysis and Hazard Mitigation, being held in Algarve, Portugal, September 13-15. This biennial conference is the latest in a successful series that began in 1998 and that includes many practical applications demonstrating how to analyze and manage risk and mitigate hazards. The applications cover man-made as well as natural hazards, the importance of which is becoming increasingly evident in our modern world. These problems have become a priority for all governments as well as a cause for public concern. The second conference is the Fifth International Conference on Prevention, Assessment, Rehabilitation and Development of Brownfield Sites, also being held in Algarve, September 14-16. The biennial conference was first held in 2002 and covers the challenges the public and private sectors must face in seeking to reuse brownfield sites and to capitalize on the opportunities.
