Flutter Carmine Zaccagnino, 2020-02-25 Work in Flutter, a framework designed from the ground up for dual-platform development with support for native Java, Kotlin, or Objective-C. Swift methods from Flutter apps. Write your next app in one language and build it for both Android and iOS. Deliver the native look, feel, and performance you and your users expect from an app written with each platform's own tools and languages. Deliver apps fast, doing half the work you were doing before and exploiting powerful new features to speed up development. Write once, run anywhere. Learn Flutter, Google's multi-platform mobile development framework. Instantly view the changes you make to an app with stateful hot reload and define a declarative UI in the same language as the app logic without having to use separate XML UI files. You can also reuse existing platform-specific Android and iOS code and interact with it in an efficient and simple way. Use built-in UI elements or build your own to create a simple calculator app. Run native Java, Kotlin, or Objective-C Swift methods from your Flutter apps and use a Flutter package to make HTTP requests to a Web API or to perform read and write operations on local storage. Apply visual effects to widgets, create transitions and animations, create a chat app using Firebase, and deploy everything on both platforms. Get native look and feel and performance in your Android and iOS apps and the ability to build for both platforms from a single code base. What You Need Flutter can be used for Android development on any Linux, Windows, or macOS computer, but macOS is needed for iOS development. **iPhone Guide: Maximizing the Future of Cell Phone**
