Taking on a Learning Disability Erin McCloskey,2012-08-01 In the United States approximately 2 5 million students are diagnosed as having a learning disability and the majority of those children are placed in special education because of an inability to read as expected As a result of this diagnosis these children may be placed in special education classrooms classrooms that are separate from the mainstream population For children with learning disabilities there is likely no place other than in school where a student s inability to read as expected leads to this separation from his her peers Once school is over these children play alongside the kids in their neighborhoods participate in sports teams and attend community activities This book looks at the impact of being labeled as learning disabled and separated from peers in school through the eyes of Samson a middle school student described both as learning disabled and a non reader This qualitative case study explores how Samson his family his teachers and this researcher make sense of special education and the complexities of learning to read as an adolescent Throughout this book there is a contrasting of the laws and procedures designed to guide special education with the actual experiences of those impacted by these laws and procedures Through the three years that Samson was in middle school this book investigates his perspective on his classes his interpretation of what it means to be a student in special education and the process by which he learns to read How disability gets created contested and discussed is highlighted through the many contexts that allow disability to be recognized and to fade into the background

Why Are So Many Minority Students

in Special Education? Beth Harry, Janette K. Klingner, 2014-04-01 The second edition of this powerful book examines the disproportionate placement of Black and Hispanic students in special education. The authors present compelling research-based stories representing the range of experiences faced by culturally and linguistically diverse students who fall in the liminal shadow of perceived disability. They examine the children's experiences, their families' interactions with school personnel, the teachers and schools' estimation of the children and their families, and the school climate that influences decisions about referrals to special education. Based on the authors' 4 years of ethnographic research in a large culturally diverse school district, the book concludes with recommendations for improving educational practice, teacher training, and policy renewal.
