Learning That Lasts Ron Berger, Libby Woodfin, Anne Vilen, 2016-04-05 A practical guide to deeper instruction a framework for challenging engaging and empowering students of all ages For schools to meet ambitious new standards and prepare all students for college careers and life research has shown unequivocally that nothing is more important than the quality of daily instruction Learning That Lasts presents a new vision for classroom instruction that sharpens and deepens the quality of lessons in all subject areas It is the opposite of a teacher proof solution Instead it is predicated on a model of instruction that honors teachers as creative and expert planners of learning experiences for their students and who wish to continuously grow in their instructional and content knowledge It is not a theoretical vision It is a model of instruction refined in some of the nation's most successful public schools schools that are beating the odds to create remarkable achievement sited primarily in urban and rural low income communities Using case studies and examples of powerful learning at all grade levels and in all disciplines Learning That Lasts is a guide to creating classrooms that promote deeper understanding higher order thinking and student independence Through text and companion videos readers will enter inspiring classrooms where students go beyond basics to become innovators collaborators and creators Learning That Lasts embraces a three dimensional view of student achievement that includes mastery of knowledge and skills character and high quality work It is a guide for teachers who wish to make learning more meaningful memorable and connected to life and inspire students to do more than they think possible

Research Methods in Public Administration and Nonprofit Management David E. McNabb, 2015-06 Designed for both students and practitioners the new edition of this popular text has

been thoroughly revised It incorporates the latest thinking in public administration and nonprofit management The book integrates both quantitative and qualitative approaches to research and also provides specific instruction in the use of commonly available statistical software programs such as Excel and SPSS The book is exceptionally well illustrated with plentiful exhibits tables figures and exercises Practical Composition Russell Brickey,,Laura L. Beadling,Evelyn Martens,2014-08-14 For English instructors at every level the task of producing a worthwhile workable plan for each class period can prove challenging This invaluable work offers a vast compilation of writing exercises and in class activities collected from professors graduate students and lecturers from colleges and universities across the United States Step by step instructions guide teachers through class discussions and exercises on topics ranging from invention argumentation formatting thesis development and organization to rhetorical situation visual rhetoric peer review and revision From high school teachers and first time teaching assistants to experienced writing professors looking to enhance their courses anyone who teaches English will appreciate the fresh ideas found in this indispensable volume Instructors considering this book for use in a course may request an examination copy here The Wire in the College Classroom Karen Dillon,Naomi Crummey,2015-04-01 The Wire s provocative subject matter layered narrative and explicit critiques of American socio economic institutions make it one of the most teachable television series in recent years This collection of new essays offers practical examples for implementing The Wire in the college classroom as a cultural text to engage students in critical and creative inquiry The essays provide a disciplinary framework for using the series in media studies writing and narrative ethics and rhetoric and education and literacy Each essay details the pedagogical goals of teaching the series or specific episodes how it was employed in class and student responses to the material Instructors considering this book for use in a course may request an examination copy here , *Advanced Research Methods in the Built Environment* Andrew Knight,Les Ruddock,2009-03-16 This book provides a bridge between the introductory research methods books and the discipline specific higher level texts Its unique feature is the coverage of the detailed process of research rather than the findings of research projects Chapter authors have been carefully selected by their expertise discipline and location to give an eclectic range of perspectives Particular care has been taken to balance positivist with interpretivist approaches throughout The authors focus is on the practical consequences of research philosophies strategies and techniques by using their own research and by evaluating the work of others Advanced Research Methods in the Built Environment addresses common topics raised by postgraduate level researchers rather than dealing with all aspects of the research process Issues covered range from the practicalities of producing a journal article to the role of theory in research The material brought together here provides a valuable resource for the training and development of doctoral and young researchers and will contribute to a new sense of shared methodological understanding across built environment research Computational Models of Argument S. Parsons,N. Oren,C. Reed,2014-09-10 Argumentation which has long been a topic of study in

philosophy has become a well established aspect of computing science in the last 20 years This book presents the proceedings of the fifth conference on Computational Models of Argument COMMA held in Pitlochry Scotland in September 2014 Work on argumentation is broad but the COMMA community is distinguished by virtue of its focus on the computational and mathematical aspects of the subject This focus aims to ensure that methods are sound that they identify arguments that are correct in some sense and provide an unambiguous specification for implementation producing programs that reason in the correct way and building systems capable of natural argument or of recognizing argument The book contains 24 long papers and 18 short papers and the 21 demonstrations presented at the conference are represented in the proceedings either by an extended abstract or by association with another paper The book will be of interest to all those whose work involves argumentation as it relates to artificial intelligence

Demystifying Academic Writing in Higher Education: A Process View on Academic Textual Production Xinghua Liu, Rui Alexandre Alves, Angelique Aitken, Josef Schmied, 2025-10-30

Academic writing in this Research Topic refers to the type of writing demonstrating students disciplinary knowledge of and proficiency in synthesizing analyzing and responding critically to new information Hyland 2004 Swales 1990 which may include those genres like course essays project reports research proposals lab notes journal articles conference paper theses and dissertations As the current workplaces have become increasingly specialized higher education worldwide has been increasingly charged with the task of developing students academic writing and correspondingly on students parts learning through writing has been necessary for them to succeed in higher education To prepare university students for writing challenges during the past decades numerous studies have been devoted to the study of linguistic and rhetorical resources in students academic writing under such umbrella terms like style reader awareness authorial voice writers identity stance evaluation textual structures steps and moves Charles Hunston Hinkel 2002 However previous research on academic writing has been predominantly focused on the linguistic and rhetorical aspects namely the final product of students writing while the nature and processes of composition students engagement and individual differences and the influence of contextual factors like emerging technology have been under explored Thus the goal of this Research Topic is to bring a process

oriented and dynamic perspective to the study of textual production in academic contexts by both encouraging an expanded view of existing research paradigms and also welcoming novel approaches Data can be collected by using corpus building interviews and questionnaires but we would also welcome the use of experimental methods and a mixed method approach for data collection Meanwhile previous research mainly studied university students who were learning English as a second or foreign language hence we also welcome research examining first language writers and students who are learning a second or foreign language other than English We believe for the study of the complex phenomenon like academic writing no single method or tool can suffice Therefore we strongly recommend a more creative perspective in data collection and analyzing and interpreting academic writing Papers can present quantitative data analyses based on experimental design or qualitative data analyses stemmed from more ethnographic oriented research Systematic review studies are also welcome We encourage contributions related but not restricted to the following topics 1 Cognitive processes in academic texts planning composing and revisions and student writers individual differences 2 Metacognition and self regulation in academic texts planning composing and revisions and student writers individual differences 3 Motivation and self efficacy in academic texts planning composing and revisions and student writers individual differences 4 Linguistic and rhetorical choices identity construction and disciplinary knowledge construction 5 Student writers textual production peer feedback and interactions with discourse communities 6 Affordances and challenges of artificial intelligence AI in the process of academic textual production in higher education
