14 November Economics Paperzimsec:

Becoming Zimbabwe. A History from the Pre-colonial Period to 2008 Brian Raftopoulos, Alois Mlambo, 2009-09-15
Becoming Zimbabwe is the first comprehensive history of Zimbabwe spanning the years from 850 to 2008. In 1997 the then Secretary General of the Zimbabwe Congress of Trade Unions Morgan Tsvangirai expressed the need for a more open and critical process of writing history in Zimbabwe. The history of a nation in the making should not be reduced to a selective heroic tradition but should be a tolerant and continuing process of questioning and re-examination. Becoming Zimbabwe tracks the idea of national belonging and citizenship and explores the nature of state rule, the changing contours of the political economy and the regional and international dimensions of the country's history. In their Introduction, Brian Raftopoulos and Alois Mlambo enlarge on these themes and Gerald Mazarire's opening chapter sets the pre-colonial background. Sabelo Ndlovu tracks the history up to WW1 and Alois Mlambo reviews developments in the settler economy and the emergence of nationalism leading to UDI in 1965. The politics and economics of the UDI period and the subsequent war of liberation are covered by Joseph Mtisi, Munyaradzi Nyakudya and Teresa Barnes. After independence in 1980 Zimbabwe enjoyed a period of buoyancy and hope. James Muzondidya's chapter details the transition from buoyancy to crisis and Brian Raftopoulos concludes the book with an analysis of the decade-long crisis and the global political agreement which followed.

Making Politics in Zimbabwe's Second Republic Gordon Moyo, Kirk Helliker, 2023-05-16
The book provides a fresh and innovative interpretation of the new government of Zimbabwe led by Emmerson Mnangagwa which emerged in late 2017 after the downfall of Robert Mugabe. It demonstrates the contradictory character of the Mnangagwa government involving both continuities and discontinuities in relation to Mugabe's regime. The temptation amongst Zimbabwean scholars has been to focus on the continuities and to dismiss the significance of any discontinuities, notably reform measures. This book adopts an alternative approach by identifying and focusing specifically on the existence of a formative project of the Mnangagwa's Second Republic, further analysing its political significance as well as risks and limitations. While doing so, the book covers topics such as reform measures, reconciliation, transitional justice, corruption, the media, agriculture, devolution and the debt crisis as well as health and education. Discussing the limitations of these different reform measures, the book highlights that any scholarly failure to identify the risks of the project leads to an incomplete understanding of what constitutes the Mnangagwa's Second Republic. The book appeals to students, scholars and researchers of Zimbabwean and African studies, political science and international relations as well as policymakers interested in a better understanding of political reform processes.

Kanyenze: Zimbabwe: The Link Between Politics and , 2023-03-20
In this accessible and authoritative book, Godfrey Kanyenze provides a comprehensive and far-reaching analysis of the socio-economic development in Zimbabwe in light of the expanding authoritarianism and the ongoing destruction of democratic institutions during the four decades after independence. Kanyenze describes the various phases of the socio-economic development starting with

Grid-locked African Economic Sovereignty Warikandwa, Tapiwa Victor,Nhemachena, Artwell,2019-02-06 The emergent so called Fourth Industrial Revolution is regarded by some as a panacea for bringing about development to Africans This book dismisses this flawed reasoning Surfacing how investors are actually looting and plundering Africa how the industrial internet of things the gig economies digital economies and cryptocurrencies breach African political and economic sovereignty the book pioneers what can be called anticipatory economics which anticipate the future of economies It is argued that the future of Africans does not necessarily require degrowth postgrowth postdevelopment postcapitalism or sharing solidarity economies it requires attention to age old questions about African ownership and control of their resources Investors have to invest in ensuring that Africans own and control their resources Further it is pointed out that the historical imperial structural creation of forced labour is increasingly morphing into what we call the structural creation of forced leisure which is no less lethal for Africans Because both the structural creation of forced labour and the structural creation of forced leisure are undergirded by transnational neo imperial plunder theft robbery looting and dispossession of Africans this book goes beyond the simplistic arguments that Euro America developed due to the industrial revolutions *Uneven Zimbabwe* Patrick Bond,1998 *Uneven Zimbabwe* examines the influence of domestic and international financial markets and financiers in uneven development in Zimbabwe using and contributing to the tools of radical political economy Theoretically Bond begins with criticism of the classical Marxist concepts of finance capital for focusing on institutional characteristics and failing to grasp underlying dynamics Instead as economic crisis tendencies emerge the power of finance periodically intensifies temporarily displacing crisis through time and space and across geographical scales But the limits of the financial solution become evident when paper assets delink from the productive assets they are meant to represent as well as in the

role that finance plays in amplifying uneven development across different economic sectors spaces and scales
