Halbrook, 2022-11-28 There are over forty four million AR 15s and similar semiautomatic rifles owned by Americans Popular adoption on such a monumental scale is indicative of more than a passing fad only proven utility through long history creates such lasting indeed growing demand Since the founding of the American republic rifles beginning with muzzleloaders and later semiautomatics have been at the center of American history and pre history This book by renowned historian and attorney Stephen Halbrook is the definitive account of this centrality of repeating rifles to the American story from its conception to the present day Some factions of state and national politicians now seek to remake America in a different novel image by rushing to ban and restrict access to firearms that have long been our heritage As Halbrook decisively shows theirs is a war against the Second Amendment and the tradition of freedom and self sufficiency that has sustained our storied past Our rights hang in the balance not as lone pillars but history shows as dominos ready to fall in quick succession Halbrook comprehensively reviews the historical legal and policy arguments advanced by gun prohibitionists and demonstrates that these bans are deeply antagonistic to our
