The Architect and the Academy

Dean Hawkes, 2021-12-30 This book presents an expansive overview of the development of architectural and environmental research with authoritative essays spanning Dean Hawkes' impressive 50 year academic career. The book considers the relationship between the technologies of the environment and wider historical and theoretical factors with chapters on topics ranging from the origins of modern building science in Renaissance England to technology and imagination in architecture. It includes numerous architectural examples from renowned architects such as Christopher Wren, Peter Zumthor, Alvar Aalto, Robert Venturi and Carlo Scarpa. Aimed at students, scholars and researchers in architecture and beyond, this illustrated volume collates important and wide-ranging essays tracing the definition, scope and methodologies of architectural and environmental studies, with a foreword by Susannah Hagan.

MoMoWo · 100 projects in 100 years. European Women in Architecture and Design · 1918-2018 Ana Fernandez Garcia, Helena Seražin, Emilia Maria Garda, Caterina Franchini, 2016-09-01 This publication is aimed to support two MoMoWo traveling exhibitions which will be presented in six European countries in two years: 2016 indoor exhibition catalogue *100 Works in 100 Years European Women in Architecture and Design 1918-2018* and outdoor exhibition *Women's Tale A Reportage on Women Designers Exhibition* catalogue *100 Works in 100 Years European Women in Architecture and Design 1918-2018*. It brings together a selection of some of the most significant and representative examples of European architecture and design created by 100 women from the end of the First World War up until today. The number of works is symbolic as one hundred could also mean countless as in the Latin word *centum*. While the number of authors each work has a different author, it derives from MoMoWo's choice to represent many different creators, consequently popularising lesser-known figures too. It includes biographies of women architects, civil engineers, furniture and industrial designers, urban planners, interior and landscape designers. It represents the main trends and major schools of architecture and design all over Europe. The biographical data covers education and training, professional histories, networks women have operated in, including informal societies, memberships in trade bodies and associations, their profile as international, national, local and regional designers, as well as looking at how women have promoted their work, i.e. in exhibitions, publications, competition entries, etc. The catalogue entries are followed by thirteen thematic essays on women architects and designers, and by the outdoor exhibition catalogue *Women's Tale A Reportage on Women Designers* where photographs by ten finalists of the MoMoWo Photo competition are presented. By seeking to identify women who worked in Europe as well as European women who worked outside Europe over the last 100 years, the main aim of this catalogue is to increase the awareness of historians and the general public about their enormous contribution to architecture and design, and indirectly providing accessibility to their works. _____ Razstavni katalog *100 Works in 100 Years European Women in Architecture and Design 1918-2018* prina a izbor nekaterih najbolj reprezentativnih

Architecture After Deleuze and Guattari Chris L. Smith, 2023-06 This study illuminates the complex interplay between Deleuze and Guattari's philosophy and architecture Presenting their wide ranging impact on late 20th and 21st century architecture each chapter focuses on a core Deleuzian Guattarian philosophical concept and one key work of architecture which evokes contorts or extends it Challenging the idea that a concept or theory defines and then produces the physical work and not vice versa Chris L Smith positions the relationship between Deleuze and Guattari's philosophy and the field of architecture as one that is mutually substantiating and constitutive In this framework modes of architectural production and experimentation become inextricable from the conceptual territories defined by these two key thinkers producing a rigorous discussion of theoretical practical and experimental engagements with their ideas
