

The background of the slide is an abstract geometric composition. It features several overlapping, semi-transparent planes in various shades of gray and black. These planes are oriented at different angles, creating a sense of depth and movement. In the lower right quadrant, there is a prominent grid pattern, possibly representing a window or a architectural detail, which is also partially obscured by the overlapping planes. The overall aesthetic is modern and architectural.

Architecture Photography And The Contemporary Past:

Architecture, Photography and the Contemporary Past Claes Caldenby, Julia Tedroff, Andrej Slávik, Martin Farran-Lee, 2014 As traces left behind by the last two hundred years of profound historical change architecture and photography contribute both to our contemporary skyline and to our image of the past Their common history thus provides an indispensable background to every discussion of what has been called the contemporary past that is to modernity considered as an open problem rather than a closed historical period Architecture can be seen as a kind of macromodernity a social scope where the diverse discourses of modernity have assumed their most large scale form In analogy photographic media constitute a micromodernity where the underside of modern society has been registered identified classified and archived In both cases we trace out the irregular borderline between the discursive and its opposite the material At this point of intersection an interesting confrontation between traditional academic historiography and an artistic application of historical perspectives might be staged What contribution can architecture and photography make to the exploration of our contemporary past Page 4 of cover

Nineteenth-Century Photographs and Architecture Micheline Nilsen, 2017-07-05 Eschewing the limiting idea that nineteenth century architecture photography merely reflects functionality the objective of this collection is to reflect the aesthetic intellectual and cultural concerns of the time The essays hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early decades of photography but focuses on the thematic content of the material It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic

Architecture in Nineteenth-Century Photographs Micheline Nilsen, 2017-07-05 Revealing that nineteenth century photography goes beyond the functional to reflect the aesthetic intellectual and cultural concerns of the time this study proposes that each photographic image of architecture be studied both as a primary visual document and an object of aesthetic inquiry This multi faceted approach drives Architecture in Nineteenth Century Photographs Essays on Reading a Collection Despite three decades of post colonial post structuralist and gender conscious criticism the study of architectural photography continues to privilege technical

virtuosity This volume offers a thematic exploration of the material and a socio historical examination that allows consideration of questions that have not been addressed comprehensively before in a single publication Themes include exoticism and armchair tourism the absence of women from architectural photography the role of photographs as commodities vernacular architecture and the picturesque and historic preservation urban renewal and nationalism Micheline Nilsen analyzes photographs from France and England the two countries where photography was invented and from around the world representing a corpus of over 10 000 photographs from the Janos Scholz Collection of Nineteenth Century Photographs of the Snite Museum of Art at the University of Notre Dame Photography, Modern Architecture, and Design Vitra Design Museum,2005-01-01 Examining the photographic collection that Alberto Sartoris donated to the Swiss federal government this text throws light on a poorly understood aspect of 20th century architecture namely the mechanisms behind the creation and diffusion of the image of modern architecture **Photography, Architecture, and the Modern Italian Landscape** Lindsay Harris,2024-11-19 Photography Architecture and the Modern Italian Landscape explores the impact of photography at a pivotal moment in Italian architecture and culture focusing on the period between 1910 and the mid 1970s The book analyzes architectural photographs taken by Italian cultural figures who helped transform the Italian landscape into what we know today This study charts the oscillation of Italians ideas about what progress signified For example the book demonstrates that for writers and artists familiar with ancient ideas about civilization in 1910 the Roman countryside exemplified the contradictions inherent in primitivism On the one hand their photographs praised the region s primordial beauty yet their images condemned the crudeness of local living conditions More broadly it traces the history of primitivism and photography in Italy to show how cultural leaders alarm at the nation s pre modern living conditions their aspiration to modernize them and their grasp of photography to catalyze the process helped forge the modern Italian landscape its monuments housing infrastructure and natural environments At the same time it explores a vibrant period in photographic history when the advent of photographic reproduction as a commercial process developed into a medium with its own visual style capable of shaping ideas about modernity This new image making and reproduction technology empowered Italy s cultural leaders not simply to represent the Italian landscape through photography but to determine how it developed Of interest to researchers and students from a range of disciplines modern architecture photography and Italian studies this book demonstrates the power of art to transform society and to reformulate our ideas of progress *Architectural Photography* Adrian Schulz,2012-01-25 Architectural photography is more than simply choosing a subject and pressing the shutter release button it s more than just documenting a project An architectural photograph shows the form and appeal of a building far better than any other medium With the advent of the digital photographic workflow architects are discovering exciting new opportunities to present and market their work But what are the ingredients for a successful architectural photograph What equipment do you need How can you improve your images in your digital darkroom Why does a building

Culture Vishvesh Prabhakar Kandolkar, 2024-11-27 This book chronicles the visual history of the Basilica of Bom Jesus one of the longest surviving churches from Goa's Portuguese colonial era In the sixteenth century this baroque church in Old Goa was constructed to house the sacred relics of St Francis Xavier and is emblematic of Goa Dourada or Golden Goa Despite their early modern origins monuments like the Basilica continue to influence visual culture that pertains to Goa Accordingly this book uncovers the traces of architectural images of Goa's sixteenth and seventeenth century monuments and conducts a genealogical study of how uses of religious architecture shift over time Thus even as the Basilica originally functioned to portray or recall a grand empire by evoking the notion of Goa Dourada its iconicity has been employed in marking Goa's difference from the rest of India thereafter By employing an analysis of historical texts illustrations photography film and pageantry this volume demonstrates how the image of the Basilica has been employed to create a discourse on Goan identity In fact right from the colonial period when Goa was heralded as the Rome of the East to the post Portuguese period when Goa became an idyllic destination for leisure tourism architectural images of Bom Jesus have been central in shaping Goa's identity Goa's Bom Jesus as Visual Culture will be useful to students and educators in the fields of architecture history anthropology sociology history of architecture and colonial postcolonial studies Finally the long history of a single monument that the book documents highlights how Goans have been shaping their unique culture At the same time as Goans imbibed Portuguese and other European influences they also domesticated and remade such colonial heritage in South Asian fashion and in turn contributed to global aesthetics *The Routledge Handbook of Architecture, Urban Space and Politics, Volume I*

Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering

any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license
