Architecture For Humanity Portland:

Architecture in an Age of Uncertainty Benjamin Flowers, 2016-04-15 In the past two decades economic bubbles inflated and architectural spending around the globe reached fever pitch In both well established centers of capital accumulation and far flung locales audacious building projects sprang up while the skyscraper heretofore more commonly associated with American capitalism seemed as if it might pack up and relocate to Dubai and Shanghai Of course much has changed in the past couple of years In formerly free spending Dubai the tallest building in the world is now is named after the president of Abu Dhabi after he stepped in with last minute debt financing In cities across the United States housing prices have nose dived and cleared lots sit ready for commercial redevelopment that likely won't take place for another decade Similar stories are not hard to find in many other nations Architecture firms that swelled in flush days are jettisoning employees at a startling rate In the context of economic instability and its attendant social and political consequences this edited volume brings together scholars critics and architects to discuss the present state of uncertainty in the practice and discipline of architecture The chapters are organized into three main areas of inquiry economics practice and technology Within this larger framework authors explore issues of security ecological design disaster architecture the future of architectural practice and the ethical obligations of the social practice of design In doing so it argues that this period has actually afforded architecture a valuable moment of self reflection where alternative directions for both the theory and practice of architecture might be explored rather than continuing with an approach which was so nurtured by capitalist prosperity and affluence

JACKET **Designed for Habitat** David Hinson, Justin Miller, 2013-05-07 If you're looking for ways to give back to your community then this book is the first to profile thirteen projects designed and built by architects and Habitat for Humanity will help. Detailed plans, sections and photographs show you how these projects came about, the strategies used by each team to approach the design and construction process and the obstacles they overcame to realize a successful outcome. The lessons and insights presented here will aid you whether you're an architect, architecture student, Habitat affiliate leader or an affordable housing advocate. Located all across the United States, these projects represent the full spectrum of Habitat for Humanity affiliates from large urban affiliates to small rural programs. These cases illustrate a broad range of innovative approaches to energy performance, alternative construction strategies and responses to site context. And each house demonstrates that design quality need not fall victim to the rigorous imperatives of cost, delivery and financing. **An Architectural Guidebook to Portland** Bart King, 2001 Portland, Oregon is a city widely known for its civic planning, preservation and inviting atmosphere.
