Kostof Book Award Honorable Mention 2018 The conservation of old Sanaa is a major cultural heritage initiative that began in the 1980 s under the auspices of UNESCO it continues today led by local agencies and actors In contrast to other parts of the world where conservation was introduced at a later date to remediate the effects of modernization in Yemen the two processes have been more or less concurrent This has resulted in a paradox unlike many other countries in the Middle East that abandoned traditional construction practices long ago in Yemen these practices have not died out Builders and craftsmen still work in traditional construction and see themselves as caretakers of the old city At the same time social forms that shaped the built fabric persist in both the old city and the new districts Yemenis in effect are not separated from their heritage by an historical divide What does it mean to conserve in a place where the historic past is in some sense still alive How must international agencies and consultants readjust theory and practice as they interact with living representatives of this historic past And what are the implications of the case of Sanaa for conservation in general Building a World Heritage City addresses these questions and also fosters greater cultural understanding of a little known but geopolitically important part of the world that is often portrayed exclusively in terms of unrest and political turmoil Golf Course Architecture Michael J. Jamieson, 2005-12-08 Historical archaeology one of the fastest growing of archaeology s sub fields in North America has developed more slowly in Central and particularly South America Happily this circumstance is ending as a gr ing number of recent projects are successfully integrating textual and material culture data in studies of the events and processes of the last 500 years This interval and this region often called Ibero America have been studied for a century or more by historians with traditional perspectives and emphases focusing on colonial elites and large scale politico economic events Such

inclinations fit well into world system and other core peri ery models that have had a major impact on historical thought since the 1970s Over the past 20 years or so however world system models have come under fire from historians anthropologists and others in part because the emphasis on global trends and the growth of capitalism nies the importance of understanding variability in local histories and circumstances Historians have increasingly turned their attention to lo cal rural and domestic contexts thereby illuminating the great diversity of responses to colonial domination that were played out in the vast arena of the Americas It is not coincidental that this is the intellectual climate in which historical archaeology is establishing itself in Central and South America
