**Architecture Or Techno-utopia** Felicity Dale Elliston Scott,2010 Felicity Scott traces an alternative genealogy of the postmodern turn in American architecture focusing on a set of experimental practices and polemics that emerged in the late 1960s and early 1970s The Routledge Handbook of Architecture, Urban Space and Politics, Volume I Nikolina Bobic,Farzaneh Haghighi,2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license *Architecture and Capitalism* Peggy Deamer,2013-07-18 *Architecture and Capitalism* tells a story of the relationship between the economy and architectural design Eleven historians each discuss in brand new essays the time period they know best looking at cultural and economic issues which in light of current economic crises you will find have dealt with diverse but surprisingly familiar economic issues Told through case studies the narrative begins in the mid nineteenth century and ends with 2011 with introductions by Editor Peggy Deamer to pull the main themes together so that you can see how other architects in different times and in different countries have dealt with similar economic conditions By focussing on what previous architects experienced you have the opportunity to avoid repeating the past With new essays by Pier Vittorio Aureli Ellen Dunham Jones Keller Easterling Lauren Kogod Robert Hewison Joanna Merwood Salisbury Robin Schuldenfrei Deborah Gans Simon Sadler Nathan Rich and Micahel Sorkin Architecture and the Image at the Turn of the 21st Century Sanja Rodeš,2024-06-28 This book examines architecture image and media relationships as productive for

architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture s far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies     **As Seen** Zoë Ryan,2017-01-01 Exhibitions have long played a crucial role in defining disciplinary histories This fascinating volume examines the impact of eleven groundbreaking architecture and design exhibitions held between 1956 and 2006 revealing how they have shaped contemporary understanding and practice of these fields Featuring written and photographic descriptions of the shows and illuminating essays from noted curators scholars critics designers and theorists **As Seen** Exhibitions that Made Architecture and Design History explores the multifaceted ways in which exhibitions have reflected on contemporary dilemmas and opened up new processes and ways of working Providing a fresh perspective on some of the most important exhibitions of the 20th century from America Europe and Japan including This Is Tomorrow Expo 70 and Massive Change this book offers a new framework for thinking about how exhibitions can function as a transformative force in the field of architecture and design     **New Views on R. Buckminster Fuller** Hsiao-yun Chu,Roberto G. Trujillo,2009 In this book leading scholars in architecture design history and communications discuss the work of R Buckminster Fuller in the context of the larger social and cultural patterns of the twentieth century     *The Routledge Companion to Contemporary Architectural History* Duanfang Lu,2023-07-31 The Routledge Companion to Contemporary Architectural History offers a comprehensive and up to date knowledge report on recent developments in architectural production and research Divided into three parts Practices Interrogations and Innovations this book charts diversity criticality and creativity in architectural interventions to meet challenges and enact changes in different parts of the world through featured exemplars and fresh theoretical orientations The collection features 29 chapters written by leading architectural scholars and highlights the

reciprocity between the historical and the contemporary research and practice and disciplinary and professional knowledge Providing an essential map for navigating the complex currents of contemporary architecture the Companion will interest students academics and practitioners who wish to bolster their understanding of built environments     *A Companion to Contemporary Design since 1945* Anne Massey, 2019-03-26 A critical overview of contemporary design and its place within the broader context of art history A Companion to Contemporary Design since 1945 introduces readers to a collection of specially commissioned essays exploring the complex areas of design that emerged through the latter half of the twentieth century design history design methods design studies and more recently design thinking The book delivers a thoughtful overview of all design disciplines and also strives to stimulate inter disciplinary debate and examine unconsidered convergences among design applications in different fields By offering a new perspective on design the articles assembled here present a challenging account of the boundaries between design history and its cognate disciplines especially art history The volume comprises five sections Time Place Space Objects and Audiences that discuss environments for design and how we interact with designed objects and spaces Notable features include 24 new essays reflecting the current state of design history and theory and examining developments on a global basis Contributions by eminent scholars and practitioners from around the globe Enriched throughout with illustrations A Companion to Contemporary Design since 1945 provides a new and thought provoking revision of our conception and understanding of contemporary design that will be essential reading for students at both undergraduate and graduate levels as well as researchers and teachers working in design history theory and practice and in related fields     **Architecture and the Welfare State** Mark Swenarton, Tom Avermaete, Dirk van den Heuvel, 2014-09-15 In the decades following World War Two and in part in response to the Cold War governments across Western Europe set out ambitious programmes for social welfare and the redistribution of wealth that aimed to improve the everyday lives of their citizens Many of these welfare state programmes housing schools new towns cultural and leisure centres involved not just construction but a new approach to architectural design in which the welfare objectives of these state funded programmes were delineated and debated The impact on architects and architectural design was profound and far reaching with welfare state projects moving centre stage in architectural discourse not just in Europe but worldwide This is the first book to explore the architecture of the welfare state in Western Europe from an international perspective With chapters covering Austria Belgium France Germany Italy The Netherlands Sweden and the UK the book explores the complex role played by architecture in the formation and development of the welfare state in both theory and practice Themes include the role of the built environment in the welfare state as a political project the colonial dimension of European welfare state architecture and its export to Africa and Asia the role of welfare state projects in promoting consumer culture and economic growth the picture of the collective produced by welfare state architecture the role of architectural innovation in the welfare state the role of the architect as opposed to construction companies and others in determining what was built the

relationship between architectural and social theory the role of internal institutional critique and the counterculture Contributors include Tom Avermaete Eve Blau Nicholas Bullock Miles Glendinning Janina Gosseye Hilde Heynen Caroline Maniaque Benton Helena Mattsson Luca Molinari Simon Pepper Michelle Provoost Lukasz Stanek Mark Swenarton Florian Urban and Dirk van den Heuvel      *What is Architectural History?* Andrew Leach, 2013-05-03 What is Architectural History considers the questions and problems posed by architectural historians since the rise of the discipline in the late nineteenth century How do historians of architecture organise past time and relate it to the present How does historical evidence translate into historical narrative Should architectural history be useful for practicing architects If so how Leach treats the disciplinarity of architectural history as an open question moving between three key approaches to historical knowledge of architecture within art history as an historical specialisation and most prominently within architecture He suggests that the confusions around this question have been productive ensuring a rich variety of approaches to the project of exploring architecture historically Read alongside introductory surveys of western and global architectural history this book will open up questions of perspective frame and intent for students of architecture art history and history Graduate students and established architectural historians will find much in this book to fuel discussions over the current state of the field in which they work
