Active Middleware Services Salim Hariri, Craig A. Lee, Cauligi S. Raghavendra, 2012-09-10 The papers in

this volume were presented at the Second Annual Workshop on Active Middleware Services and were selected for inclusion here by the Editors. The AMS workshop was organized with support from both the National Science Foundation and the CAT center at the University of Arizona and was held in Pittsburgh, Pennsylvania on August 1, 2000 in conjunction with the 9th IEEE International Symposium on High Performance Distributed Computing (HPDC-9). The explosive growth of Internet-based applications and the proliferation of networking technologies has been transforming most areas of computer science and engineering as well as computational science and commercial application areas. This opens an outstanding opportunity to explore new Internet-oriented software technologies that will open new research and application opportunities not only for the multimedia and commercial world but also for the scientific and high performance computing applications community. Two emerging technologies, agents and active networks, allow increased programmability to enable bringing new services to Internet-based applications. The AMS workshop presented research results and working papers in the areas of active networks, mobile and intelligent agents, software tools for high performance distributed computing, network operating systems and application programming models and environments. The success of an endeavor such as this depends on the contributions of many individuals. We would like to thank Dr. Frederica Darema and the NSF for sponsoring the workshop.

Integrated Circuit and System Design, Power and Timing Modeling, Optimization and Simulation Jorge Juan Chico, Enrico Macii, 2003-10-02 Welcome to the proceedings of PATMOS 2003. This was the 13th in a series of international workshops held in several locations in Europe. Over the years PATMOS has gained recognition as one of the major European events devoted to power and timing aspects of integrated circuit and system design. Despite its significant growth and development, PATMOS can still be considered as a very informal forum featuring high level scientific presentations together with open discussions and panel sessions in a free and relaxed environment. This year PATMOS took place in Turin, Italy, organized by the Politecnico di Torino with technical co-sponsorship from the IEEE Circuits and Systems Society and the generous support of the European Commission as well as that of several industrial sponsors including BullDAST, Cadence, Mentor Graphics, STMicroelectronics and Synopsys. The objective of the PATMOS workshop is to provide a forum to discuss and investigate the emerging problems in methodologies and tools for the design of new generations of integrated circuits and systems. A major emphasis of the technical program is on speed and low power aspects with particular regard to modeling, characterization, design and architectures. Web Services Liang-Jie Zhang, 2004-09-23
