Architects at Work Mary Anne Hunting, Kevin D. Murphy, 2025-02-18 The first comprehensive history of the role of women architects within the history of American modernism

Women, Practice, Architecture Naomi Stead, 2016-01-08 The image of the architect is undeniably gendered While the male architect might be celebrated as the ideal man in Hollywood romantic comedies blessed with practicality and creativity in equal measure to impeccable taste and an enviable lifestyle the image of the woman architect is not so clear cut While women have been practicing and excelling in architecture for more than a hundred years their professional identity as constructed in the media is complex and sometimes contradictory This book explores the working lives and aspirations of women in architectural practice but more than this it explores how popular media newspapers magazines and websites serve to define and describe who a woman architect should be what she should look like and how she should behave Looking further into the way that professional characteristics are reinforced through awards like the Pritzker Prize the book demonstrates how idealised characteristics such as sensitivity and vision are seen to be neither entirely masculine nor feminine but instead a complex hybrid owing much to historic concepts of genius Drawing on history sociology media analysis and feminist theories of architectural practice the book will be of interest to all of those who seek to better understand the image and identity of the architect This book was published as a double special issue of *Architectural Theory Review*

Reconstructing Architecture Thomas A. Dutton, Lian Hurst Mann, 1996 Reconstructing Architecture was first published in 1996 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions To create architecture is an inherently political act yet its nature as a social practice is often obscured beneath layers of wealth and privilege The contributors to this volume question architecture's complicity with the status quo moving beyond critique to outline the part architects are playing in building radical social movements and challenging dominant forms of power The making of architecture is instrumental in the construction of our identities our differences the world around us much of what we know of institutions the distribution of power social relations and cultural values is mediated by the built environment Historically architecture has constructed the environments that house the dominant culture Yet as the essays in Reconstructing Architecture demonstrate there exists a strong tradition of critical practice in the field one that attempts to alter existing social power relations Engaging the gap between modernism and postmodernism each chapter addresses an oppositional discourse that has developed within the field and then reconstructs it in terms of a new social project feminism social theory environmentalism cultural studies race and ethnic studies and critical theory The activists and scholars writing here provide a clarion call to architects and other producers of culture challenging them to renegotiate their political allegiances and to help reconstruct a viable democratic life in the face of inexorable forces driving economic growth destroying global ecology homogenizing culture and privatizing the public realm Reconstructing Architecture reformulates the role of architecture in society as well as its capacity to further a progressive social transformation Contributors Sherry
