shows Smith was central to the establishment of the Beaux Arts perspective in the South through his academic and professional career. After studying with Paul Philippe Cret at the University of Pennsylvania, Smith moved to Atlanta in 1909 to head the new architecture program at the Georgia Institute of Technology. He would go on to train some of the South's most significant architects, including Philip Trammell Shutze, Flippen Burge, Preston Stevens, Ed Ivey, and Lewis E. Crook Jr. In 1922, Smith formed a partnership with Robert S. Pringle. In Atlanta, Savannah, Chattanooga, Jacksonville, Sarasota, Miami, and elsewhere, Smith built office buildings, hotels, and Art Deco skyscrapers. Buildings at Georgia Tech, the Baylor School in Chattanooga, and the Darlington School in Rome, Georgia, Gothic Revival churches, standardized bottling plants for Coca-Cola, and houses in a range of traditional period styles in the suburbs. Smith's love of medieval architecture culminated with his 1962 masterwork, the Cathedral of St. Philip in Atlanta. As his career drew to a close, Modernism was establishing itself in America. Smith's own modern aesthetic was evidenced in the more populist modern of Art Deco, but he never embraced the abstract machine aesthetic of high Modernism. Robert M. Craig details the role of history in design for Smith and his generation, who believed that architecture is an art and that ornament, cultural reference, symbolism, and tradition communicate to clients and observers and enrich the lives of both. This book was supported in part by generous grants from the Graham Foundation for Advanced Studies in the Fine Arts and the Georgia Tech Foundation Inc.

Histories of Architecture Education in the United States Peter L. Laurence, 2023-10-31. *Histories of Architecture Education in the United States* is an edited collection focused on the professional evolution, experimental and enduring pedagogical approaches, and leading institutions of American architecture education. Beginning with the emergence of architecture as a profession in Philadelphia and ending with the early work but unfinished international effort of making room for women and people of color in positions of leadership in the field, this collection offers an important history of architecture education relevant to audiences both within and outside of the United States. Other themes include the relationship of professional organizations to educational institutions, the legacy of late nineteenth-century design concepts, the role of architectural history, educational changes, and trans-Atlantic intellectual exchanges after WWII and the Cold War, the rise of the city and urban design in the architect's consciousness, student protests and challenges to traditional architecture education, and the controversial appearance of environmental activism. This collection, in other words, provides a relevant history of the present with topics of concern to all architects studying and working today.
