Department of Defense Appropriations for 2011 United States. Congress. House. Committee on Appropriations. Subcommittee on Department of Defense, 2011      **The Army Lawyer**, 2012      **Advance and Destroy** John Rickard, 2011-10-01 In the winter of 1944-1945 Hitler sought to divide Allied forces in the heavily forested Ardennes region of Luxembourg and Belgium. He deployed more than 400,000 troops in one of the last major German offensives of the war which became known as the Battle of the Bulge in a desperate attempt to regain the strategic initiative in the West. Hitler's effort failed for a variety of reasons but many historians assert that Lieutenant General George S. Patton Jr.'s Third Army was ultimately responsible for securing Allied victory. Although Patton has assumed a larger than life reputation for his leadership in the years since World War II scholars have paid little attention to his generalship in the Ardennes following the relief of Bastogne. In *Advance and Destroy* Captain John Nelson Rickard explores the commander's operational performance during the entire Ardennes campaign through his estimate of the situation the U.S. Army's doctrinal approach to problem solving

Patton's day by day situational understanding of the Battle of the Bulge as revealed through ULTRA intelligence and the influence of the other Allied generals on his decision making gives readers an in depth critical analysis of Patton's overall effectiveness measured in terms of mission accomplishment his ability to gain and hold ground and a cost benefit analysis of his operations relative to the lives of his soldiers The work not only debunks myths about one of America's most controversial generals but provides new insights into his renowned military skill and colorful personality *Handbook of Railway Vehicle Dynamics, Second Edition* Simon Iwnicki, Maksym Spiryagin, Colin Cole, Tim McSweeney, 2019-11-14 Handbook of Railway Vehicle Dynamics Second Edition provides expanded fully updated coverage of railway vehicle dynamics With chapters by international experts this work surveys the main areas of rolling stock and locomotive dynamics Through mathematical analysis and numerous practical examples it builds a deep understanding of the wheel rail interface suspension and suspension component design simulation and testing of electrical and mechanical systems and interaction with the surrounding infrastructure and noise and vibration Topics added in the Second Edition include magnetic levitation rail vehicle aerodynamics and advances in traction and braking for full trains and individual vehicles *At War with Women* Jennifer Greenburg, 2023-02-15 At War with Women reveals how post 9 11 politics of gender and development have transformed US military power In the mid 2000s the US military used development as a weapon as it revived counterinsurgency in Iraq and Afghanistan The military assembled all female teams to reach households and wage war through development projects in the battle for hearts and minds Despite women technically being banned from ground combat units the all female teams were drawn into combat nonetheless Based on ethnographic fieldwork observing military trainings this book challenges liberal feminist narratives that justified the Afghanistan War in the name of women's rights and celebrated women's integration into combat as a victory for gender equality Jennifer Greenburg critically interrogates a new imperial feminism and its central role in securing US hegemony Women's incorporation into combat through emotional labor has reinforced gender stereotypes with counterinsurgency framing female soldiers as global ambassadors for women's rights This book provides an analysis of US imperialism that keeps the present in tension with the past clarifying where colonial ideologies of race gender and sexuality have resurfaced and how they are changing today **Diagnosis & Prognosis of AAR Affected Structures** Victor E.
