2015 Vulcan Repair Manual:

V-Force Jonathan Glancey, 2025-08-07 As World War II came to an end and America's nuclear bombing of Hiroshima and Nagasaki shocked the world it became clear that the nascent Cold War would be as different a conflagration from WWII as that war was from WWI. Believing that the UK was extremely vulnerable to nuclear attack it was quickly determined that only the threat of large scale damage from similar weapons could prevent a Soviet attack. And thus V Force was born. Entered into service between 1955 and 1957 the three models of V class bombers that made up Britain's strategic nuclear strike force the Vickers Valiant Avro Vulcan and Handley Page Victor were modern marvels of machinery. Capable of both high and low level attack with their sleek delta wing designs and supremely quick despite the massive bomb loads they carried these aircraft were central tenets of Britain's nuclear weapons development. Despite a fall as precipitous as their rise when the Royal Navy took over Britain's nuclear deterrent role in 1968 like a phoenix from the ashes the V bombers enjoyed a second life as conventional bombers the Valiant gaining fame in the Suez Crisis the Victors in the Indonesia Malaysia confrontation and the Vulcans undertook the longest bombing raid in history for Operation Black Buck in the Falklands Campaign of 1982. V Force is both an ode to these most resilient and beautiful of British aircraft and a lens through which to view Britain's Cold War experience. Eject! Eject! John Nichol, 2023-05-25

Eject! Eject! When the call is made to abandon an aircraft it's only the beginning of the story. From the Sunday Times bestselling writer John Nichol author of Spitfire Lancaster and Tornado comes a brilliant new book that reveals the astonishing story of an invention that has saved many thousands of lives around the world including his own: the ejection seat. Nichol tells the remarkable tale of how the ejection seat was first conceived during the Second World War as countless lives were lost in accidents and in battle. In the wake of the war that technological race to save aircrew lives using explosive seats continued at an incredible pace. Nichol tells the story of the brave men who risked their lives testing those early devices and interviewed the first British pilot to eject back in 1949 when ejection from pulling the handle to being under the parachute took thirty seconds. Today that figure is down to around one second. Packed with interviews with aircrew who know exactly how it feels to Bang Out from an aircraft at high speed both in peace and in war the book gives the reader a vivid sense of what that life saving experience feels like but also features the moving accounts of what happens next from the viewpoint of both the crews and their families who often have little or no information about whether or not their loved ones have survived. Because ejecting is just the start of a journey. Packed with dramatic action incredible science and moving recollections Eject Eject is an essential read.
