IN ALL AGES & ABILITIES people deserve to use their local communities and provide ideas for alternative transportation. A good design is one that is safe, healthy, and accessible to all. It is a design that is not just for the young and fit, but for all ages and abilities. It is a design that is not just for the young and fit, but for all ages and abilities. Clapp, 2006-09-26 The 2007 NESC Handbook Sixth Edition edited by Allen Clapp is an essential companion to the Code It gives users insight into what lies behind the NESC's rules and how to apply them The Handbook was developed for use at many levels in the electric and communication industries including those involved in system design construction maintenance inspection standards development and worker training The Handbook also discusses how the NESC Committee has interpreted the rules in the Code and responded to change proposals during the past 85 years This allows users to understand how questions they may have were dealt with in the past The Handbook looks at how the 2007 Code with its many additions and revisions differs from the 2002 version and what this means for users The 2007 Code includes changes in a great many areas including Rounding numbers found in the rules Metal grounding poles Starting voltages and clearances Grounding and insulation for guys Clearances between transmission lines Multiplex cable attachment to neutral brackets Loading due to freezing rain and wind Fiber reinforced polymer elements Worker loads Equipment bonding Arc exposure analysis Antenna radiation exposure limits The 2007 edition also contains new appendices on loading and conductor movement extreme wind loading and maximum over voltage at a work site *Water in Road Structures* Andrew Dawson, 2008-10-21 Background This book is the most obvious outcome of the COST 351 WATMOVE project see www.watmove.org For most readers these terms probably mean little so some explanation is called for In 2001 2002 a small group led by Kent Gustafson of the Swedish Road and Traffic Institute VTI made a proposal to the European programme on Co-operation in Science and Technology COST They proposed that a pan-European team be set up to study the issue of Water Movements in Road Pavements and Embankments acronym WATMOVE The COST organisation agreed the proposal and the study formally began in December 2003 with the support of COST Due to ill health Kent was not able to lead the project and I was asked by the Management Committee to chair the project team Scope of the Book This book is NOT about Water and Roads nor on Water on Roads There are other books which deal with surface water drainage in great detail and there are other source materials that deal with the impact of roads on water in the general environment To cover every aspect of the interaction between water and highways would have required a much greater effort and a much thicker book So this book seeks to limit itself to i Water inside the road construction and the underlying subgrade soils and rocks 1 ii Water from the surface down to the phreatic surface and iii
