Matthew's Non-Messianic Mapping of Messianic Texts Bruce Henning, 2020-11-16 Scholars often explain Matthew's practice of applying non messianic texts to the messiah by postulating a Christological hermeneutic In Matthew's Non Messianic Mapping of Messianic texts Bruce Henning raises the question of how Matthew applies messianic texts to non messianic figures This neglected category challenges the popular view by stretching Matthew's paradigm to a broadly eschatological one in which disciples share in the mission of Jesus so as to fulfill Scriptural hopes Using Cognitive Linguistics this volume explores four case studies to demonstrate Matthew's non messianic mapping scheme the eschatological shepherd the vineyard care giver temple

construction imagery and the Isaian herald These reveal how Matthew's theology of discipleship as participating in Jesus' own vocation extends even to his hermeneutical paradigm of fulfillment

Natural Language Syntax Peter W. Culicover, 2009-01-29 In this book Peter Culicover introduces the analysis of natural language within the broader question of how language works of how people use languages to configure words and morphemes in order to express meanings He focuses both on the syntactic and morphosyntactic devices that languages use and on the conceptual structures that correspond to particular aspects of linguistic form He seeks to explain linguistic forms and in the process to show how these correspond with meanings The book's clear step by step exposition is presented within the Simpler Syntax framework whose development has been led by the author and Ray Jackendoff over the last fifteen years This integrates syntactic theory with the representation of conceptual structure and casts fresh light on the interface between syntax and semantics It also enables elegant and economical analyses of natural language phenomena without recourse to such abstract devices as functional heads and uniform binary branching Peter Culicover opens his account with an overview of the nature of language and the aims of its analysis He then divides the book into parts devoted to syntactic categories syntactic structure and argument structure argument realization unbounded dependencies and clausal structure He provides exercises problems and suggestions for further reading throughout the book
