Chamberlain, Ana-Lucia Varbanescu, Hatem Ltaief, Piotr Luszczek, 2021-06-17 This book constitutes the refereed proceedings of the 36th International Conference on High Performance Computing ISC High Performance 2021 held virtually in June July 2021 The 24 full papers presented were carefully reviewed and selected from 74 submissions The papers cover a broad range of topics such as architecture networks and storage machine learning AI and emerging technologies HPC algorithms and applications performance modeling evaluation and analysis and programming environments and systems software From Mobility to Accessibility Jonathan Levine, Joe Grengs, Louis A. Merlin, 2019-11-15 Levine Grengs and Merlin marshal a compelling case to shift to accessibility oriented planning providing much needed conceptual clarity as to what accessibility is and is not But their book also represents a major step toward transforming accessibility from a vaguely defined aspiration into concrete measures that can guide planning decisions Journal of the American Planning Association In From Mobility to Accessibility an expert team of researchers flips the tables on the standard models for evaluating regional transportation performance Jonathan Levine Joe Grengs and Louis A Merlin argue for an accessibility shift whereby transportation planning and the transportation dimensions of land use planning would be based on people's ability to reach destinations rather than on their ability to travel fast Existing models for planning and evaluating transportation which have taken vehicle speeds as the most important measure would make sense if movement were the purpose of transportation But it is the ability to reach destinations not movement per se that people seek from their transportation systems While the concept of accessibility has been around for the better part of a century From Mobility to Accessibility shows that the accessibility shift is compelled by the fundamental purpose of transportation The book argues that the shift would be transformative to the practice of both transportation and land use planning but is impeded by many conceptual obstacles regarding the nature of accessibility and

its potential for guiding development of the built environment By redefining success in transportation the book provides city planners decisionmakers and scholars a path to reforming the practice of transportation and land use planning in modern cities and metropolitan areas **Ham Radio Magazine** ,1978 **Proceedings of the 2022 International Conference on Green Building, Civil Engineering and Smart City** Wei Guo,Kai Qian,2022-09-07 This book of the conference proceedings focuses on innovative design technology and methods in the fields of building civil engineering and smart city It contains a large number of detailed design construction and performance analysis charts benefited to students teachers research scholars and other professionals in related fields As well readers will encounter new ideas for realizing more safe intelligent and economical buildings **Soil-Steel Bridges** Damian Beben,2020-03-04 The primary objective of this book is to provide designers with a set of analysis and design specifications for soil steel bridges and culverts also called flexible structures Brief but informative this guide is based on a quick look up approach to code applications design and analysis methods calculations as well as applications and solved examples The book addresses the unique aspects of soil steel bridges design and analysis as well as examples of applications numerical analysis and modeling techniques corrosion and durability problems service life and maintenance and impact of moving loads *David Busch's Nikon Z5 II Guide to Digital Photography* David D.
