1. Answer: b "NAPNPs could assist a nurse who is writing information about LPN/LVN standards. The purposes of NAPNPs and National Federation of Licensed Practical Nurses (NFLPN) are to set standards for practical/vocational nursing programs. Patients and patient practical/vocational nursing. Educate and inform the general public about practical/vocational nursing. For issues related to interprofessional conflict, the nurse could first attempt sensitive communication with those who are bullying or harassing. If this is unsuccessful, it would be appropriate to go up the chain of command. Issues with nursing students can be reported to the nursing instructor or the education liaison. For job seeking, the nurse could use personal contacts, the Internet, or nurse recruiters.
2. Answer: b Care management is a condition in a state to deliver care. The LPN/LVN assists the RN in address clinical outcomes. The RN acts like the clinical pathway and coordinates and plans patient care for individuals and groups of patients. Case finding is another type of medical outcome of care. Utilization-review is conducted to expand the role of the employer. The LPN/LVN must not exceed scope of practice and cannot be expected to assume RN responsibilities.
3. Answer: d Long-term care facilities employ the majority of LPN/LVNs. However, hospitals,

clinics, outpatient agencies, home health agencies, insurance companies, HCP offices, and the military services offer additional opportunities.

4. Answer: 1, 2, 3, 4, 5 The LPN/LVN consensus came findings to members of the health care team, demonstrates caring, and regularly to using therapeutic communication skills with patients. Administrators can according to professional standards and collect data from and high success. The LPN/LVN would collaborate with the RN, but would not independently care for the care plan for a newly admitted patient.
5. Answer: 3 Reports indicate that challenges related to findings of social isolation, increasing aging, about care effectiveness, nursing, nursing education, inability to incorporate standard styles of caring into the curriculum, and a lack of study with models in the profession exist. In addition to the high abilities of male nursing students from nursing programs.
6. Answer: 3 Advanced directives could include a health care proxy or attorney that states who should make health care decisions if the patient is unable to make them. A "living will" outlines wishes about end of life care. Ideally, everyone should carefully consider advance directives and have discussions with family members, caregivers, and the health care team.
7. Answer: 2 One of the primary problems of early nineteenth-century hospitals was poor hygiene practices. Hospitals were dirty and overcrowded and care was mostly given by untrained persons.
8. Answer: b The population is aging rapidly and people with chronic illness are living longer. There is an increased need for nursing services for this growing segment of the population.
9. Answer: b "Lighting up" Nurses' improved patient care and advanced the practice of nursing through good hygiene, sanitation, patient observation, accurate record-keeping, institutional improvements, and the introduction and use of new equipment.
10. Answer: b The two major concepts are nurse-patient, health, and environment.
11. Answer: c Private, for-profit, and non-profit placement are factors in increasing health care

12. Answer: 2 Physiologic needs, such as eating and respiration, are the first priority according to Maslow.
13. Answer: b Adolescents in later adolescence and belonging to a peer group are very important thing, just as it is in the first year to help him meet this need.
14. Answer: 1, 3, 5 Patient can participate in making decisions about weight, and alcohol intake reduction and control over mental health and health. Giving information about technology, new medications, and needs may be of interest to the patient, but these topics are less useful in helping the patient take an active role in his own health.
15. Answer: 3 A follow-up visit is presented. If APN are trained to assist patients with active level of daily living. The end secondary nurses support using electronic or bedside support tools. While the LPN/LVN or other workers can direct visitors, visitors' questions should be sent to giving out patient information. Patients should know self-managing that a patient has been admitted to the hospital can be viewed as a violation of confidentiality. Taking vital signs is acceptable; however, the pharmacist generally administers medications. Validating and interpreting are nursing responsibilities.
16. Answer: 2 Environmental use of time and money also the first way to contain costs for health-related patients. Subsequent measures don't help to contain costs. While it is appropriate to question the HCP about safety issues, it is not appropriate to question use of diagnostic testing. Diagnosis is an extremely complicated process, which requires an extensive knowledge about pathology. Interviewing patients to monitor their ability for financial factors to another part of the health care system.
17. Answer: b Orem's theory is based on helping the patient to attain self care. Nightingale's theory was manipulation of the environment (i.e., patient's exposure to disease and limited demonstration caring by visiting the patient to help. Pave's theory encourages the patient to participate in the health experience.
18. Answer: 1, 2, 3, 4, 5 Under the terms of this document, patients are assured that they can expect high-quality hospital care: a clean and safe environment, involvement in their care, and the decision-making process, protection of privacy, help when leaving the hospital, and help with follow-up concerns. 20. Answer: 3 LPN/LVNs never independently alter the plan of care without the supervision of an RN.
21. Answer: 3 For primary prevention, the nurse could encourage wellness activities and participate screening programs such as colonoscopy or glucose screening. Secondary prevention recognizes the presence of disease but seeks to reduce the impact of the condition by encouraging behaviors to prevent health, such as dietary modification for recurrent hyperglycemia. Tertiary prevention is applied by making long-term care for those with chronic health problems with the goal of improving the quality of life and reducing further loss of function.

Critical Thinking Activities

1.

Before nursing _____ a nurse Expected role of nurse health	Desired or expected role of health This patient has some health problems and some changes in her life, but she has a relatively high level of confidence. Her blood pressure is under control and she has adapted to a major change in treatment, by taking on a new challenge in volunteering. The positive outlook on life allows her to find joy in the prospect of sharing time with a new generation.

2.
 - a. Originally, the white physical cap and the apron signified respectability, cleanliness, and vigilance. Caps gradually became symbols of office and achievement and were adorned with popping ornaments. Uniforms became more informal and more complicated than caps introduced with care, covered hair loss, took too much time for washing and changing, and were a source of bacteria. Health care facilities and nursing schools typically have three rules for rules of uniforms and for rules that members are generally required to wear hairnets and identification badges. Many nurses do not approve of mandatory dress codes. They argue that other health care professionals do not depend on uniforms for their authority.
