Water Park Mid-Course Project Tasks

Task #4

Review your results for Module 4 problems 1. Provide a cost analysis of the project to repair the pool.

Include a description of the most relevant inputs, a concise summary the work done, the cost of the project, and the calculations used to find this information. You may want to review problem 2 as well and provide an explanation of the observations in attendance to the waterpark and how this will benefit the park. How will this impact paying for these upgrades?

TestSoup's Guide for the Common Core: 6th Grade Math Laura Shanteler,2013-10-12 Our 6th Grade Common Core Math eBook is designed to explain the Common Core Standards and provide students the opportunity to practice the basic skills needed to be successful when taking the new Common Core Assessments in the 2013 2014 school year Students will prepare for the new Common Core Assessments by building proficiency in the basic skills needed for 6th Grade Math with Standard Overviews that explain each objective in easy to understand terms so you know exactly what your student will learn during the school year and what they need to know how to do to be on grade level Vocabulary lists that help students become familiar with the math vocabulary they will work with during the year Practice Problems for each standard that give students multiple chances to practice the various skills needed to be successful with Common Core A full length diagnostic test for students to take at the beginning of the year to see which skills they already know and ones they will need to practice throughout the year 2 Full length practice tests for students to use throughout the year to track progress Annotated answers for each and every problem in the diagnostic and practice tests that clearly explain how to solve each problem on the test This eBook is designed to align to the Common Core Standards and set students up for success on the PARCC and Smarter Balance Assessments You can use this to pace your student through 6th grade or use this to give your 5th grader a head start or your 7th grader a review of the basics Like us on Facebook Follow us on Twitter Keep an eye out for our new app set to launch on all iOS platforms Learn with our eBooks study with our flashcard sets practice with our practice test system and connect with others taking the same test as you all in one place

Algebra Teaching around the World Frederick K.S. Leung,Kyungmee Park,Derek Holton,David Clarke,2014-10-13 Utilizing the LPS dataset Algebra Teaching around the World documents eighth grade algebra teaching across a variety of countries that differ geographically and culturally Different issues in algebra teaching are reported and different theories are used to characterize algebra lessons or to compare algebra

teaching in different countries Many commonalities in algebra teaching around the world are identified but there are also striking and deep rooted differences The different ways algebra was taught in different countries point to how algebra teaching may be embedded in the culture and the general traditions of mathematics education of the countries concerned In particular a comparison is made between algebra lessons in the Confucian Heritage Culture CHC countries and Western countries It seems that a common emphasis of algebra teaching in CHC countries is the linkage or coherence of mathematics concepts both within an algebraic topic and between topics On the other hand contemporary algebra teaching in many Western school systems places increasing emphasis on the use of algebra in mathematical modeling in real world contexts and in the instructional use of metaphors where meaning construction is assisted by invoking contexts outside the domain of algebraic manipulation with the intention to helping students to form connections between algebra and other aspects of their experience Algebra Teaching around the World should be of value to researchers with a focus on algebra pedagogy or international comparisons of education Because of the pedagogical variations noted here there is a great deal of material that will be of interest to both teachers and teacher educators
