implementations available in C C and Java **Probability and Statistics** Ronald Deep, 2006 Probability Statistics with Integrated Software Routines is a calculus based treatment of probability concurrent with and integrated with statistics through interactive tailored software applications designed to enhance the phenomena of probability and statistics The software programs make the book unique The book comes with a CD containing the interactive software leading to the Statistical Genie The student can issue commands repeatedly while making parameter changes to observe the effects Computer programming is an excellent skill for problem solvers involving design **Algorithms in Decision Support**

Systems Vicente García-Díaz, 2021-03-19 This book aims to provide a new vision of how algorithms are the core of decision support systems DSSs which are increasingly important information systems that help to make decisions related to unstructured and semi unstructured decision problems that do not have a simple solution from a human point of view It begins with a discussion of how DSSs will be vital to improving the health of the population The following article deals with how DSSs can be applied to improve the performance of people doing a specific task like playing tennis It continues with a work in which authors apply DSSs to insect pest management together with an interactive platform for fitting data and carrying out spatial visualization The next article improves how to reschedule trains whenever disturbances occur together with an evaluation framework The final works focus on different relevant areas of DSSs 1 a comparison of ensemble and dimensionality reduction models based on an entropy criterion 2 a radar emitter identification method based on semi supervised and transfer learning 3 design limitations errors and hazards in creating very large scale DSSs and 4 efficient rule generation for associative classification We hope you enjoy all the contents in the book **Computational Logistics**

Francesco Corman, Stefan Voß, Rudy R. Negenborn, 2015-09-18 This book constitutes the refereed proceedings of the 6th International Conference on Computational Logistics ICCL 2015 held in Delft The Netherlands in September 2015 The 50 papers presented in this volume were carefully reviewed and selected for inclusion in the book They are organized in topical sections entitled transport over ground transport over water international coordination within a system external coordination among systems
