Three major goals of funded STEM programs are to attract and prepare students at all educational levels to pursue coursework in the STEM content areas; to prepare graduates to pursue careers in STEM fields; and to improve teacher education programs in the STEM content areas. Drawing upon these goals as the framework for *Recruiting, Preparing, and Retaining STEM Teachers for a Global Generation*, the 15 chapters contained herein highlight both the challenges and successes of recruiting, preparing, and sustaining novice teachers in the STEM content areas in high-need schools. Recruiting, retaining, and sustaining highly qualified teachers with expertise in STEM content areas to work in hard-to-staff schools and geographic areas are necessary to equalize educational opportunities for rural and urban Title 1 students. High teacher turnover rates, in combination with teachers working out of field, leave many students without highly qualified teachers in STEM fields. Most of the chapters in this volume were prepared by scholars who received NSF funding through Noyce and are engaged in addressing research questions related to these endeavours.
