From GCSEs to EBCs Great Britain. Parliament. House of Commons. Education Committee, 2013 The Government's plans for replacing GCSEs with new English Baccalaureate Certificates in some subjects is trying to do too much too fast Introducing several fundamental changes at the same time and to a tight timetable will jeopardise the quality of the reforms and may threaten the stability of the wider exam system GCSEs need significant improvements in order to restore public confidence in the exam system but the Government still needs to make the case that the GCSE brand is so discredited that it is beyond repair MPs are also concerned about the impact of the changes on subjects outside the English Baccalaureate where students will be taking GCSEs for some time to come according to the Government's plans The report also questions how well the Government's proposals will serve lower attaining pupils who are often the most disadvantaged There is no evidence that the proposed changes will help to tackle under achievement or narrow the attainment gap between the richest and poorest students any more effectively than GCSEs The Government is also called upon to re think its plans for a Statement of Achievement specifically for lower attaining pupils MPs agree that changes are needed to the way in which exams are run but they raise serious concerns about franchising subjects to exam boards The report is critical of the Government's decision to abolish some GCSEs before publishing the outcomes of the National Curriculum Review and its proposed changes to the school accountability system MPs also note the wide ranging stakeholder opposition to many of the Government's proposals

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee,2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

Economic Modeling in the Post Great Recession Era John E. Silvia,Azhar Iqbal,Sarah Watt House,2016-12-14 Reality based modeling for today s unique economic recovery Economic Modeling in the Post Great Recession Era presents a more realistic approach to modeling using direct statistical applications to address the characteristics and trends central to current market behaviors This book s unique focus on the reality of today s markets makes it an invaluable resource for students and practitioners seeking a comprehensive guide to more accurate forecasting While most books treat the economy as if it were in a vacuum building models around idealized or perception biased behaviors this book deals with the economy as it currently stands in a state of recovery limited by financial constraints imperfect information and lags and disparities in price movements The authors identify how these characteristics impact various markets behaviors and quantify those behaviors using SAS as the primary statistical tool Today s economy bears a number of unique attributes that usual modeling methods fail to consider This book describes how to approach modeling based on real world observable data in order to make better informed decisions in today s markets Discover the three economic characteristics with the greatest impact on various markets Create economic models that mirror the current post recession reality Adopt statistical methods that identify and adapt to structural breaks and lags Factor real world imperfections into modeling for more accurate forecasting The past few years have shown a clear demarcation between policymakers forecasts and actual outcomes As the dust settles on the Great Recession after effects linger and impact our current recovery in ways that diverge from past experience and theoretical expectations Economic Modeling in the Post Great Recession Era provides comprehensive guidance grounded in reality for today s economic decision makers

Prestressed Members with External Fiber-Reinforced Polymer (FRP) Tendons Tiejiong Lou,Yanan Wu,Sergio M.R. Lopes,2025-02-03 Prestressed Members with External Fiber Reinforced Polymer FRP Tendons Design Assessment and Modelling provides an overview of using FRPs including how to predict the short term and long term behavior of externally prestressed concrete or steel concrete composite members their second order effects and how to examine the effectiveness

of using FRP tendons instead of steel tendons for external prestressing As external prestressing is considered to be one of the most powerful techniques in strengthening of existing structures this book provides a comprehensive resource on the topics covered The conventional use of prestressing steel is however naturally prone to corrosion The best strategy to solve completely the corrosion problem is the use of nonmetal materials instead of prestressing steel Fiber reinforced polymer FRP composites are ideal materials used for external tendons for their excellent corrosion resistance high strength and low weight Covers the use of FRP tendons when compared to those with external steel tendons including key design issues Addresses important topics in the field including the second order effects of immediate and sustained loads Examines the stress in external tendons moment redistribution linear transformation of external cables and prestress secondary moments Covers long term deformation prediction Chief Officer: Principles and Practice includes Navigate Advantage Access

Policy 2015-2021 Christopher David Skinns, 2022-07-28 This book interrogates Conservative government penal policy for adult and young adult offenders in England and Wales between 2015 and 2021. Government penal policy is shown to have been often ineffective and costly and to have revived efforts to push the system towards a disastrous combination of austerity, outsourcing and punishment that has exacerbated the penal crisis. This investigation has meant touching on topical debates dealing with the impact of resource scarcity on offenders' experiences of the penal system, the impact of an increasing emphasis on punishment on offenders' sense of justice and fairness, the balance struck between infection control and offender welfare during the government handling of the SARS CoV 2 pandemic and why successive Conservative governments have intransigently pursued a penal policy that has proved crisis exacerbating. The overall conclusion reached is that penal policy is too important to be left to governments alone and needs to be recalibrated by a one-off inquiry complemented by an on-going advisory body capable of requiring governments to explain or change. The book is distinctive in that it provides a critical review of penal policy change whilst combining this with insights derived from the sociological analysis of penal trends.
