Description **Intermediate Algebra** John Tobey, Jr.,Jeffrey Slater,2005-02 Computing with New Resources Cristian S.

Calude, Rūsiņš Freivalds, Iwama Kazuo, 2014-12-09 Professor Jozef Gruska is a well known computer scientist for his many and broad results. He was the father of theoretical computer science research in Czechoslovakia and among the first Slovak programmers in the early 1960s. Jozef Gruska introduced the descriptive complexity of grammars, automata, and languages and is one of the pioneers of parallel systolic automata. His other main research interests include parallel systems and automata as well as quantum information processing, transmission, and cryptography. He is co-founder of four regular series of conferences in informatics and two in quantum information processing and the Founding Chair 1989-96 of the IFIP Specialist Group on Foundations of Computer Science. *Intermediate Algebra* John Tobey, Jeffrey Slater, 2005 A worktext format for basic college math or arithmetic courses including lecture-based, self-paced, and modular classes. John Tobey and Jeff Slater are experienced developmental math authors and active classroom teachers. The Tobey approach focuses on building skills one at a time by breaking math down into manageable pieces. This building block organization is a practical approach to basic math skill development that makes it easier for students to understand each topic, gaining confidence as they move through each section. Knowing students crave feedback, Tobey has enhanced the new edition with a How am I Doing guide to math success. The combination of continual reinforcement of basic skill development, ongoing feedback, and a fine balance of exercises makes the fifth edition of Tobey Slater *Intermediate Algebra* even more practical and accessible.
