Sustainable Energy Solutions with Artificial Intelligence, Blockchain Technology, and Internet of Things Arpit Jain, Abhinav Sharma, Vibhu Jately, Brian Azzopardi, 2023-09-15 The text provides sustainable energy solutions using smart technologies such as artificial intelligence blockchain technology and the Internet of Things It further presents several case studies on applications of the Internet of Things artificial intelligence and blockchain technology in the field of sustainable energy Focuses on the integration of smart technology including artificial intelligence and sustainable energy Covers recent advancements in energy management techniques used in residential and commercial energy systems Highlights the use of artificial intelligence machine learning and their applications in sustainable energy Discusses important topics such as green energy grid modernization smart security in the power grid and fault diagnosis Presents case studies on the applications of the Internet of Things blockchain and artificial intelligence in sustainable energy The text showcases the latest advancements and the importance of technologies including artificial intelligence blockchain and Internet of Things in achieving sustainable energy systems It further discusses the role of machine learning applied deep learning and edge computing in renewable energy The text cover key concepts such as intelligent battery management system energy trading green energy grid modernization electric vehicles and charging station optimization It will serve as an ideal reference text for senior undergraduate graduate students and academic researchers in the fields including electrical engineering electronics and communication engineering computer engineering and environmental engineering *Algebra VII* D.J. Collins, R.I. Grigorchuk, P.F. Kurchanov, H. Zieschang, 2013-12-01 From the reviews The book under review consists of two monographs on geometric aspects of group theory Together these two articles form a wide ranging survey of combinatorial group theory with emphasis very much on the geometric roots of the subject This will be a useful reference work for the expert as well as providing an overview of the subject for the outsider or novice Many different topics are described and explored with the main results presented but not proved This allows the interested reader to get the flavour of these topics without becoming bogged down in detail Both articles give comprehensive bibliographies so that it is possible to use this book as the starting point for a more detailed study of a particular topic of interest Bulletin of the London Mathematical Society 1996

Advanced Energy Efficiency Technologies for Solar Heating, Cooling and Power Generation Xudong Zhao, Xiaoli Ma, 2019-07-08 This book based on the research experience and outcomes of a group of international contributors addresses a range of advanced energy efficiency technologies and their applications in solar heating cooling and power generation while also providing solutions for tackling recurring low efficiency problems in today s systems It highlights the latest technologies and methods which can significantly improve the performance of solar systems enabling readers to design construct and apply high performance solar systems in or for their own projects The contributors provide a systematic introduction to state of the art energy efficiency technologies that demonstrates how to implement innovative solar systems

These technologies include heat pipes and loop heat pipes phase change materials PCMs and PCM slurries micro channel panels desiccant adsorption cycling ejector cooling and heat pumps and solar concentration and thermoelectric units The book shows how innovative solar systems applicable to rural and urban buildings can be analysed and demonstrates the successful implementation of these advanced technologies It delivers the design principles and associated energy performance assessment methods for a range of selected solar heating cooling and power generation projects This book offers a valuable source of information for final year undergraduate students as well as graduate students and academic lecturers as it promotes the widespread deployment of advanced solar heating cooling and power generation technologies applicable for buildings across the globe The book is also a good point of reference for design engineers and energy consultants who wish to extend their knowledge of advanced technologies used to achieve energy efficiency
