Geomatica, 2009 *Remote Sensing* J D Greer, 1996-09-30 **The Bronze Age Towers at Bat, Sultanate of Oman** Christopher P. Thornton, 2016 In the third millennium B.C.E. the Oman Peninsula was the site of an important kingdom known in Akkadian texts as Magan which traded extensively with the Indus Civilization southern Iran the Persian Gulf states and southern Mesopotamia Excavations have been carried out in this region since the 1970s although the majority of studies have

focused on mortuary monuments at the expense of settlement archaeology While domestic structures of the Bronze Age have been found and are the focus of current research at Bat most settlements dating from the third millennium B C E in Oman and the U A E are defined by the presence of large circular monuments made of mudbrick or stone that are traditionally called towers Whether these so called towers are defensive agricultural political or ritual structures has long been debated but very few comprehensive studies of these monuments have been attempted Between 2007 and 2012 the University of Pennsylvania Museum of Archaeology and Anthropology conducted excavations at the UNESCO World Heritage Site of Bat in the Sultanate of Oman under the direction of the late Gregory L Possehl The focus of these years was on the monumental stone towers of the third millennium B C E looking at the when how and why of their construction through large scale excavation GIS aided survey and the application of radiocarbon dates This has been the most comprehensive study of nonmortuary Bronze Age monuments ever conducted on the Oman Peninsula and the results provide new insight into the formation and function of these impressive structures that surely formed the social and political nexus of Magan s kingdom

Digital Earth Moving Caroline Y. Westort, 2003-06-30 Digital manipulation of landform is revolutionizing how our built environment is designed and constructed On a technical level three dimensional geometric modeling of topography has its origins at the interface of geographic information systems GIS and computer aided geometric modeling CAD the former with its representations of spatial attribute information with digital terrain in several representations Triangulated Irregular Networks contour lines etc the latter focusing primarily on the parameterization and combination of geometric primitives The broadening of these two disciplines to embrace new surveying and navigation advances e g global positioning systems GPS together with developments in engineering on the application side are leading to powerful new suites of functionality There has been a pronounced need for a forum where these traditionally separate parties can interact These proceedings contain the technical papers selected and formally presented as part of the scientific program of the First International Symposium on Digital Earth Moving 2001 DEM 2001 held September 5 7 2001 at the CIM Institute for Computing Science and Industrial Technologies of the University of Applied Science of Southern Switzerland SUPSI iCIMS in Manno Lugano Switzerland It is the first volume published on this explicit theme Thirty six submissions were received from fifteen countries with thirteen select papers and posters presented in the official program and in this publication
