The Lively Audience Patricia Palmer, 2023-12-22 The Lively Audience 1986 studies

television from the children's own point of view. Contrary to most prevailing opinion it contends that television has much to teach children and that their relationship with the medium is not one of passive dependency after all. Research shows that what children gain from television depends very much on the child's age and social experience and that children see television differently from adults. This book examines this issue and gives us a different understanding of the child audience and the impact of their television viewing.
