Rules for the Inquiring Mind Luis Rosa, 2024-09-30 This book concerns the nature and the norms of inquiry It tackles not only philosophical issues regarding what inquiry is but also issues regarding how it should and should not be executed Roughly put inquiry is the activity of searching for the true answers to questions of our interest But what is the difference between empirical and armchair inquiry And what are the right and the wrong ways to inquire Under what conditions should one start inquiring Which questions are such that one should not inquire into them The book offers answers to these questions It argues that competent armchair inquiry only makes explicit what was already implicit the inquirer already had the answer to her question before inquiring into it though this was not explicit to her It also argues that we should avoid inquiring into questions whose answers are unknowable to us in the instrumental sense of should and that different modes of inquiry are called for depending on which type of information is available to the subject These answers are rigorously argued for and they stem from a unified framework for modeling the activity of inquiry

The Oxford Handbook of Reasons and Normativity Daniel Star, 2018 The Oxford Handbook of Reasons and Normativity maps a central terrain of philosophy and provides an authoritative guide to it Few

concepts have received as much attention in recent philosophy as the concept of a reason to do or believe something. And one of the most contested ideas in philosophy is normativity: the ought in claims that we ought to do or believe something. This is the first volume to provide broad coverage of the study of reasons and normativity across multiple philosophical subfields. In addition to focusing on reasons in ethics, epistemology, and the philosophy of mind, action, and language, the Handbook explores philosophical work on the nature of normativity in general. Topics covered include the unity of normativity, the fundamentality of reasons, attempts to explain reasons in other terms, the relation of motivational reasons to normative reasons, the internalist constraint, the logic and language of reasons and ought, connections between reasons, intentions, choices, and actions, connections between reasons, reasoning, and rationality, connections between reasons, knowledge, understanding, and evidence, reasons encountered in perception and testimony, moral principles, prudence, and reasons, agent relative reasons, epistemic challenges to our access to reasons, normativity in relation to meaning, concepts, and intentionality, instrumental reasons, pragmatic reasons for belief, aesthetic reasons, and reasons for emotions.
